Basic Questions Tort Comparative Perspective:

French Civil Liability in Comparative Perspective Jean-Sébastien Borghetti, Simon Whittaker, 2019-12-26 The French law of torts or of extra contractual liability is widely seen as exceptional For long it was based on a mere five articles of the Civil Code of 1804 but on this foundation the courts and legal scholars have constructed liabilities for fault and strict liability of an extraordinary breadth and significance While the rest of the general law of obligations including contract in the Civil Code was reformed in 2016 by executive ordonnance this area was left aside being the subject in 2017 of a proposal by the French Government for the legislative reform of the law of civil liability a new legislative category to include both contractual and extra contractual liability This work considers important aspects of this developing area of French law in a series of essays by French lawyers and comparative lawyers working in French law and other civil law systems In doing so it provides insight into the doctrinal thinking and judgments of French lawyers as well as the possible directions in which this area of the law may be developed in the future

Directors & Officers (D & O) Liability Simon Deakin, Helmut Koziol, Olaf Riss, 2018-02-19 In recent years several cases concerning the liability of directors and officers have courted controversy Arguments raised in such discussions oscillate between two extremes on the one hand the need for governing bodies to give a space to entrepreneurial discretion and on the other hand to ensure the protection of investors in and creditors of a company from the consequences of disadvantageous decisions by those bodies In light of the geographical dispersal of the above stakeholders the study offers a comparative insight into the liability of directors and officers in 10 key European jurisdictions in particular Austria Czech Republic Germany Italy the Netherlands Norway Poland Spain and Switzerland and 4 non European jurisdictions namely Brazil Israel Turkey and the United States Amongst other things it investigates existing company law principles on the topic and examines their interaction with tort law and other fields with a view to suggesting principles for better stakeholder protection National reports are complemented by an economic analysis and insurance conflict of laws and comparative reports The study also benefits from case study analyses

area The final section covers a variety of different aspects of tort law and compensation systems including harms committed in the public interest damage in economic torts statutory product liability reforms and alternative compensation scheme design Powerful and thought provoking this book will provide its readers with an appreciation of the magnitude of Jane Stapleton's contribution across the common law world and a novel perspective on some of the more modern challenges faced in tort law

Essential Cases on the Limits of Liability Bénédicte Winiger, Bjarte Askeland, Elena Bargelli, Martin Hogg, Ernst Karner, 2024-11-04 European legal systems have developed a broad range of instruments aimed at limiting liability These instruments are systematically examined within the present volume which builds on the experience gathered in the various jurisdictions over the past decades and thereby fills a major gap in tort law literature The publication contains a selection of the most important cases from 27 states across Europe as well as decisions by European Union courts it also highlights cases from earlier periods of legal history For each case the facts and the relevant court decision are presented and accompanied by an analytical commentary In addition comparative analyses of the reported cases are provided and a special report is dedicated to how key cases would be resolved under model European rules on tort law The editors believe that the material gathered here may provide guidance for an organic convergence of the national legal systems in Europe It constitutes the basis of an *acquis commun* that is infinitely richer though also much more complex than the rather bland and abstract concepts contained in national codifications European legislation and modern model rules
