Battles of English History (Classic Reprint) Hereford B. George, 2018-02 Excerpt from *Battles of English History*. Battles are the most generally interesting class of events in history and not without reason. Until mankind have all been reduced to a single pattern which would put an end to history, there will be conflicting interests, sentiments, creeds, principles which will from time to time lead to war. We may settle many disputes peacefully by mutual concession or by voluntary submission to external arbitration, but an appeal to arms always lies behind and is the only resource when differences go too deep for reconciliation or when the self-respect of nations is too severely wounded. Even within a nation there are many possibilities, remote perhaps yet never unimaginable, which may bring about civil war. And though it is perfectly conceivable that a given war may be waged to the end without a single important battle, if the superior skill of one side enables it to gain overwhelming advantage without fighting, yet practically this does not happen. Battles are in fact the decisive events in the contests which are of sufficient moment to grow into war. It is very easy to exaggerate their importance, to fix attention on the climax only and lose sight of the events which led up to it and which went very far in most cases towards determining its result. But after all, the battle is the climax and the world in general may be forgiven for overestimating it. About the Publisher: Forgotten Books publishes hundreds of thousands of rare and classic books. Hopkins, Charles Martindale, Norman Vance, Rita Copeland, Patrick Cheney, Jennifer Wallace, Philip R. Hardie, 2012 *The Oxford History of Classical Reception* OHCREL is designed to offer a comprehensive investigation of the numerous and diverse ways in which literary texts of the classical world have stimulated responses and refashioning by English writers Covering the full range of English literature from the early Middle Ages to the present day OHCREL both synthesizes existing scholarship and presents cutting edge new research employing an international team of expert contributors for each of the five volumes OHCREL endeavours to interrogate rather than inertly reiterate conventional assumptions about literary periods the processes of canon formation and the relations between literary and non literary discourse It conceives of reception as a complex process of dialogic exchange and rather than offering large cultural generalizations it engages in close critical

analysis of literary texts It explores in detail the ways in which English writers engagement with classical literature casts as much light on the classical originals as it does on the English writers own cultural context This fourth volume and second to appear in the series covers the years 1790 1880 and explores romantic and Victorian receptions of the classics Noting the changing fortunes of particular classical authors and the influence of developments in archaeology aesthetics and education it traces the interplay between classical and nineteenth century perceptions of gender class religion and the politics of republic and empire in chapters engaging with many of the major writers of this period *From the accession of George the First to the Battle of Waterloo* Henry Duff Traill, James Saumarez Mann, 1909 Education Department Bulletin ,1910
