Behavioral Medicine Approaches To Cardiovascular Disease Prevention:

Behavioral Medicine Approaches to Cardiovascular Disease Prevention Kristina Orth-Gom,Neil Schneiderman,Kristina Orth-Gomer,2013-05-13 Cardiovascular disease CVD is the number one killer of men and women in industrialized countries In older age groups CVD is also the most important cause for hospitalization and in many countries it is the basis of early retirement from work Thus CVD is associated with enormous costs for care and loss of productivity as well as for disabilities pensions etc All this has motivated clinicians and scientists to develop and implement new methodologies and technologies to better care for patients who are hospitalized for heart disease Efforts to improve care in the acute phases of coronary heart disease CHD have been successful During the last decade the immediate mortality risk of a patient admitted to coronary care for a suspected myocardial infarction or other acute coronary syndrome has decreased to less than 10% Despite these achievements CVD continues to represent a major threat to the health of middle aged and elderly men and women This volume addresses myriad aspects of CHD prevention including biobehavioral and psychosocial factors behavioral epidemiology behavioral intervention models and policy The first section of the text provides an introduction to CVD prevention and behavioral medicine The second section introduces two theoretically different approaches to preventive action high risk and population based strategies The third section describes and discusses the important questions of how behavioral sciences can be conceptually integrated into traditional medically based preventive efforts The fourth section presents both population and high risk behavioral intervention approaches In summary this volume examines the social environment and its potentials for preventive actions reviews the psychosocial and biobehavioral mechanisms involved in these effects and describes concrete and practical implementations of behavioral medicine knowledge as they have been applied to CHD prevention

Handbook of Research Methods in Cardiovascular Behavioral Medicine Neil Schneiderman,Stephen M. Weiss,Peter G. Kaufmann,2013-11-21 Cardiovascular disease continues to be the number one killer of men and women in industrialized countries Behavioral medicine was developed and shaped into the one source of morbidity and mortality in our country following definition try Despite a 35% reduction since 1964 these Behavioral medicine is the interdisciplinary field concerned with diseases particularly coronary heart disease concerned with the development and integration of behavioral and biomedical science knowledge and techniques the United States Havlik Feinleib 1979 relevant to the understanding of health and illness and The Framingham study among others has identified the application of this knowledge and these techniques to prevention diagnosis treatment and rehabilitation identified three major risk factors implicated in the development of CHD smoking elevated serum cholesterol and high blood pressure Castelli et al 1978 This concept of biobehavioral collaboration 1986 Given that these factors account for less than 50% of the variance associated with CHD scientists and clinicians are challenged to consider how they might more effectively develop diagnostic treatment and preventive strategies
