### **Behavioral Problems Geography Revisited Routledge Ebook:**

**Behavioral Problems in Geography Revisited** Kevin R Cox, Reginald Golledge, 2015-12-22 This collection of papers originally published in 1981 reviews and evaluates past and possible future advances in a field of central importance to human geography behavioral geography The book includes critical studies which show how the approach has contributed substantially to work within four areas of major application in behavioral geography urban travel behavior environmental cognition residential mobility and spatial diffusion The final section of the book focuses on the shortcomings of the behavioral approach and considers the alternative modes of analysis available

**Global Ecopolitics Revisited** Philippe Le Prestre, 2017-02-10 Faced with worsening environmental indicators cooperation hurdles and the limited effectiveness of current institutions reforming international environmental governance has proven elusive despite various diplomatic initiatives at the United Nations level over the last two decades Overcoming the current dead end however may rest less in devising new arrangements than in challenging how the problem has been approached Presenting a multifaceted exploration of some of the key issues and questions in global ecopolitics this book brings together recent advances in research on global environmental governance in order to identify new avenues of inquiry and action Each chapter questions elements of the current wisdom and covers a topic that lies at the heart of global environmental governance including the reasons for engagement the evolving relationship between science and policy the potential and limits of the European Union as a key actor the role of developing and emergent countries and the contours of a complex governance of international environmental issues Laying the foundation for rethinking at a time of great transformation in global ecopolitics this book will be important reading for students of environmental politics and governance It will also be of relevance to policy makers with an interest in going beyond the prevailing discourse on this crucial topic

Globalization Development and Social Justice Ann El Khoury, 2015-03-27 Are there existing alternatives to corporate globalization What are the prospects for and commonalities between communities and movements such as Occupy the World Social Forum and alternative economies Globalization Development and Social Justice advances the proposition that another globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of

interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies      **Australia's Toxic Medical Culture** Vicki Adele Pascoe, 2018-10-11 This book explores dominance in Australia's medical culture through the positioning of international medical graduates IMGs. It argues that IMGs are othered and ultimately positioned as an underclass, a positioning validated and reinforced by the intersecting inequalities of class, race, and nation. It also suggests that the positioning of IMGs is organised through the dimensions of structural power, hegemonic power, and interpersonal power, which allow an exploration of power relations between the structures of the health system, the Australian medical profession, and the agency of IMGs. The Australian narrative presented to the world espouses a community of social justice and human rights. Instead, an historical lens traces the formation and persistence of difference represented in ethnocentrism, racism, and xenophobia from 1788 to the present. The research presented is multidisciplinary in scope. An anti-oppressive theoretical framework enables the voices of lived experience to penetrate throughout, and a social justice platform engages the participants and the reader into the interwoven conversations. The data set comprises a focus group, 10 individual interviews with IMGs, and a selection of inquiry submissions revealing rich and sometimes shocking evidence to paint a stark picture. Other medical voices join the conversation via media responses to revelations of experiences not only by IMGs but also by Australian-trained doctors. It exposes a toxic culture endemic with bullying and sexual harassment. This book is of interest to practitioners, researchers, and administrators in the fields of medical education, human resource management, legal studies, health sciences, social sciences, health services, government departments, universities, and hospitals, as well as those tasked with duty of care and the provision of a safe workplace. The voices gifted to this study raise awareness of current issues within medicine in Australia at a very personal level and begin to formulate a policy and practical response to address these disturbing revelations.

*Energy Transitions and Social Psychology* Paul Upham, Paula Bögel, Katinka Johansen, 2019-02-01 This book explains how social psychological concepts can be closely integrated with sociotechnical perspectives of energy transitions. It shows the value of actor-centred analysis that acknowledges the role of individual-level processes within their wider contexts of energy supply and use. In this way, the book connects social psychological and sociological frames of analysis, preserving the value of both to provide multi-level analytically extended accounts of energy transitions processes. Sociotechnical thinking is about the interactions of people and technology, including the rules, regulations, and institutions involved. Such perspectives help to identify the many forms of path dependency that can make change difficult. Human behaviour plays a strong role in maintaining these path dependencies, but it can also introduce change. This book advocates a deliberately interdisciplinary research agenda that recognises the value of social psychological perspectives when seeking to create new pathways for energy supply and use. At the same time, it also demonstrates the value of sociotechnical perspectives for energy-related social psychology. *Energy Transitions and Social Psychology* will be of great interest to students and scholars of energy.

Cox,Reginald G. Golledge,1969      *Routledge Revivals* Kevin Cox,Reginald Golledge,2017-12-18 Originally published in 1969 Behavioral Problems in Geography unpacks and identifies elements of behavioral models and theories The book seeks to examine their specific effects on spatial activity and to operationalize some of the concepts previously used in a subjective and descriptive manner All papers are united by a common concern for the building of geographic theory regarding human behavior Contributions in the volume vary a great deal in their emphasis ranging from philosophy and review to theorizing and operationalization Each paper recognizes the importance of examining the behavioural basis of spatial activity This book will appeal to scholars of geography and psychology alike      **Behavioral problems in geography** Kevin R.
