Chinese Urban Planning and Construction Lanchun Bian, Yan Tang, Zhenjiang Shen, 2021-05-29 This volume introduces and discusses the achievements and mechanisms of urban planning and construction in China from multiple professional perspectives covering practices and processes ranging from ancient times to the present day The book has 14 chapters each addressing a specific Chinese urban planning and construction topic with examples and applications in various cities and regions and each providing an all around analysis of Chinese urban development issues at different scales including government administrations planning progresses urban investments social impacts and construction models The book provides a comprehensive overview of urban planning and construction in China especially its successful experiences in the historical period and modern era which will greatly benefit scholars and readers who are interested in China as well as urban planners architects and historians The book is organized into 4 main parts Part 1 focuses on historical wisdom to summarize ancient Chinese efforts to cope with nature and the environment It interprets the unique wisdom of ancient Chinese cities related to regional design water conservancy system and urban districts Part 2 presents the transformation of urban planning in China by learning from both the traditional value and western experiences based on several cases such as the spatial development of Beijing and the Beijing Tianjin Hebei capital region the preservation of Qingdao city the urban community development and regeneration in Chongqing city Part 3 explores the green and eco city by looking towards the future illustrating Chinese practices and efforts to build more sustainable cities such as green and low carbon city construction in Wuhan healthy city planning and eco cities construction in China Part 4 prospects the modern miracles brought forth by technological innovation and economic growth and introduces the newest planning trends in China such as the E commerce Taobao villages in China and the innovation districts in Beijing It also explains the driving force of the growth machine of Suzhou city

National Spatial Planning in China Kai Wang, 2024-10-26 This open access book conducts systematic and comprehensive research on urban spatial development problems in China from territorial perspectives based on the scientific theory on human settlements environment By integrating the theories of globalization spatial planning state intervention and beyond the author systematically sorts out both domestic and foreign urban spatial planning theories at national levels Moreover population industries natural resources ecological environments and management mechanisms involved during the urbanization and urban development process were analyzed in order to propose the theory and methods of national spatial

planning This book is recommended for researchers and practitioners in the fields of human settlement environment urban and regional planning graduate students as well as teachers of urban planning geography architecture regional science and other related majors in universities and public officials **Chinese Cities in the 21st Century** Youqin Huang,2020-04-03 This book is an interdisciplinary examination of China's new urban development model and the challenges Chinese cities face in the 21st century China is in the midst of a historic developmental inflection point grappling with a significantly slowing economy rapidly rising inequality massive migration skyrocketing housing prices alarming environmental problems and strong pushback from the West In this volume Western and Chinese scholars in different disciplines offer the clearest look yet at some of the main challenges China faces including domestic and international contexts the new urban development model inclusion and well being of migrants and their families and urban sustainability This book sheds light on China's ongoing development and future directions and has strong policy implications for anyone interested in the future of China

Changing Spatial Elements in Chinese Socio-economic Five-year Plan: from Project Layout to Spatial Planning Lei Wang,2018-08-01 As a legacy of the socialist state with central planning Five Year Planning FYP is very important in regulating socio economic and spatial development even in post reform China This book tries to fill the research gap between examining the role of FYP and how spatial elements in the FYP mechanism have operated and transformed in spatial regulatory practices in transitional China By building a conceptual framework and studying two empirical cases at different spatial scales with the help of both qualitative and quantitative methods it helps to understand various stakeholders institutions and planning administrations mechanisms of articulating spatial planning into the FYP system and the effectiveness of spatial planning in solving place specific governance issues in urban and regional China **Urban Spatial Development in China's Pro-land Policy Reform Era** Chengri Ding,2003 China's New Urbanization Strategy China Development Research Foundation,2018-01-22 Urbanization is one of the major challenges facing China Of China's 1.3 billion people around half still live in rural areas There has been huge migration from rural areas to cities in recent years a trend that is likely to continue strong for some time The strains that this vast migration puts on China's cities are enormous This book makes available for the English speaking reader the results of a large group of research projects undertaken by CDRF one of China's leading think tanks into the details of rural urban migration the resulting urban growth and the problems associated with all this The book goes on to put forward a new strategy which aims to ensure that China's urbanization proceeds in an orderly manner and that people and their needs are put at the centre of the strategy Key parts of the strategy include that city clusters should become the main form of urbanization that these should be arranged geographically in a pattern of two horizontal lines and three vertical lines that industrial and employment structures should highlight regional features and diversity that urban public services should be more equitably distributed that there should be new forms of urbanization management and city governance to accelerate urbanization and ensure harmonious social development and

that the whole process should be conducted in an ecological green way **Urban China** The World Bank;Development Research Center of the State Council,2014-07-29 In the last 30 years China's record economic growth lifted half a billion people out of poverty with rapid urbanization providing abundant labor cheap land and good infrastructure While China has avoided some of the common ills of urbanization strains are showing as inefficient land development leads to urban sprawl and ghost towns pollution threatens people's health and farmland and water resources are becoming scarce With China's urban population projected to rise to about one billion or close to 70 percent of the country's population by 2030 China's leaders are seeking a more coordinated urbanization process Urban China is a joint research report by a team from the World Bank and the Development Research Center of China's State Council which was established to address the challenges and opportunities of urbanization in China and to help China forge a new model of urbanization The report takes as its point of departure the conviction that China's urbanization can become more efficient inclusive and sustainable However it stresses that achieving this vision will require strong support from both government and the markets for policy reforms in a number of areas The report proposes six main areas for reform first amending land management institutions to foster more efficient land use denser cities modernized agriculture and more equitable wealth distribution second adjusting the hukou household registration system to increase labor mobility and provide urban migrant workers equal access to a common standard of public services third placing urban finances on a more sustainable footing while fostering financial discipline among local governments fourth improving urban planning to enhance connectivity and encourage scale and agglomeration economies fifth reducing environmental pressures through more efficient resource management and sixth improving governance at the local level The Outline of the Eleventh Five-year Program for the National Economic and Social Development in Beijing ,2006
