Kohlberg, Francis A. Richards, Tina A. Grotzer, Jan D. Sinnott, 1990-05-23 In recent years researchers have begun to focus attention on postformal thought the development of thought in late adolescence and adulthood questioning Piaget's early terminus of structural development in adolescence This volume brings together the works of distinguished authors in the field of postformal operational cognitive social and perceptual development to examine the models and methodology used to investigate postformal thought The contributors represent the variety of approaches that characterize this body of research while at the same time seeking to unify this diverse literature with a common language An ideal text for advanced courses in adult development this volume is also a primary reference for developmental and educational psychologists and students working in the fields of cognitive development adolescent and adult development and lifespan development Divided into four parts the volume begins by examining both Piagetian and nonstructural models of adult cognitive development considering them in light of current research developments Individual papers address models of equilibrium knowledge reflective judgment ego development and consciousness In Part II the contributors discuss the measurement and comparison of cognitive development in adults exploring such topics as construct validity and theories of adult development the structural and developmental relations between formal and postformal capacities and the relationship between Piagetian and Kohlbergian stages The third section assesses the research and theory of adult reasoning in the moral domain while the concluding chapter investigates critical evaluations of postformal research Numerous tables and figures enhance the discussions Handbook of Adult Development Jack Demick, Carrie Andreoletti, 2012-12-06 This volume is an outgrowth

of contemporary research on development over the adult lifespan which by now has burgeoned and developed both nationally and internationally However for us the impetus to be involved in this area was spawned and nurtured by our initial association with the Society for Research in Adult Development SRAD with its origins some 15 years ago by Michael Commons and his associates in Cambridge Massachusetts Through the good will and support of this society we also became and are still heavily involved with the Journal of Adult Development and the Kluwer Plenum Monograph Series on Adult Development and Aging of which this volume is a companion Many of the contributions in the volume are from SRAD members who consistently adhere to a focus on positive adult development Their chapters have been complemented by pieces from

other researchers who have adopted more mainstream approaches to adult development and or aging Regardless of the particular approach and or focus of the chapter all the work reported herein supports the relatively recent idea that development is not restricted to children and adolescents but continues throughout the adult lifespan in ways that we never envisioned some 20 years ago Thus the volume represents state of the art theory research and practice on adult development which has the potential to occupy us all for some time to come

Piaget Today (Psychology Revivals) Barbel Inhelder, Denys de Caprona, Angela Cornu-Wells, 2013-10-01 Originally published in 1987 the contributors bring their different orientations to the study of child development and genetic epistemology to show the continuing value of Piaget's theory and its fruitfulness in providing insights which permit the advancement of science This volume contains the proceedings of the VIIth Advanced Course of the Fondation Archives Jean Piaget held at the University of Geneva in 1985 The lectures and discussions included in this volume will help the reader to understand Piaget in the context of twentieth century science and philosophy and to consider the present and future of the theory as it was seen at the time of original publication

Integral Theory in Action Sean Esbjörn-Hargens, 2010-08-01 In a world as complex as ours an integral approach is needed to help sort through a dynamic landscape and respond effectively to individual and collective challenges Integral Theory in Action provides the first multi authored overview of such an approach Integral Theory is the result of 30 years of research and is being applied in over 35 distinct disciplines This volume brings together two dozen leading scholar practitioners who are actively applying integral principles and who address a range of issues from an integral perspective including climate change embodiment feminist aesthetics community discourse treatment of depression developmental theory and global ethics The strengths limitations and potential of Integral Theory and Ken Wilber's AQAL model are weighed by each contributor This collection pushes the field of Integral Theory in new ways and new directions and provides a comprehensive overview that makes it an invaluable resource for any integral effort

Handbook of Adult Development and Learning Carol Hoare, 2006-03-30 Adult development and learning have always existed as two separate fields of study with development falling under psychology and learning under education Recent advances in theory research and practice however have made it clear that an important reciprocal relationship exists between them advances in development frequently lead to learning and conversely learning quite often fuels development The synchronicity between development and learning is responsible for positive changes in many capacities including insight intelligence reflective and meta cognition personality expression interpersonal competence and self efficacy This synchronicity is also leading to the growth of a new discipline at the borders of adult development and learning The Handbook of Adult Development and Learning is the first to bring together the leading scholars from both adult development and learning to explore what will form the foundation for this new discipline the latest research at the intersection of these fields It examines six major aspects of their intersection foundations key areas of integration the self system higher reaches of development and learning essential contexts and specific applications An introductory chapter

explains why it is so important to recognize and fuel the growth of this new discipline Subsequent chapters review the latest theoretical and empirical literature and provide a rich itinerary for future research This handbook is a must read for all who promote optimal aging It will be an invaluable reference for scholars in development and education as well as rich resource for policy makers and practitioners such as corporate executives and human resource personnel **Complexity and**
