The Impact of Automatic Control Research on Industrial Innovation Silvia Mastellone, Alex van Delft, 2023-12-08 The Impact of Automatic Control Research on Industrial Innovation Bring together the theory and practice of control research with this innovative overview Automatic control

research focuses on subjects pertaining to the theory and practice of automation science and technology subjects such as industrial automation robotics and human machine interaction With each passing year these subjects become more relevant to researchers policymakers industrialists and workers alike The work of academic control researchers however is often distant from the perspectives of industry practitioners creating the potential for insights to be lost on both sides The Impact of Automatic Control Research on Industrial Innovation seeks to close this distance providing an industrial perspective on the future of control research It seeks to outline the possible and ongoing impacts of automatic control technologies across a range of industries enabling readers to understand the connection between theory and practice The result is a book that combines scholarly and practical understandings of industrial innovations and their possible role in building a sustainable world The Impact of Automatic Control Research on Industrial Innovation readers will also find Insights on industrial and commercial applications of automatic control theory Detailed discussion of industrial sectors including power automotive production processes and more An applied research roadmap for each sector This book is a must own for both control researchers and control engineers in both theoretical and applied contexts as well as for graduate or continuing education courses on control theory and practice Editorial board Silvia Mastellone University of Applied Science Northwestern Switzerland Alex van Delft vanDelft it DSM Tariq Samad University of Minnesota Iven Mareels Federation University Australia IBM Scott Bortoff Mitsubishi Electric Research Labs Stefano Di Cairano Mitsubishi Electric Research Labs Alisa Rupenyan ETHZ
