Regenerative Sanitation Thammarat Koottatep, Peter Emmanuel Cookey, Chongrak Polprasert, 2019-02-15 This book proposes Regenerative Sanitation as the next era of sanitation management and attempts to provide a foundation for the study of sanitation on the premise that sanitation is a complex and dynamic system that comprises of social ecological technological and resource systems The preconception is that sanitation will deliver maximal benefits to society only when there exists a cyclical integration of the three subsystems to enable appropriate linkages between technological design and the delivery platform so as to achieve optimal and sustained sanitation solutions It also calls for the rethinking of sanitation to change the narrative towards more progressive trajectories such as resource recovery and reuse rather than just amelioration It explores the contributions to food security livelihood support urban regeneration rural development and even local economies A new paradigm theory and ten principles for ensuring practical and effective sanitation solutions and management is presented In addition is a unique conceptual framework applicable to both developed and developing countries and to all stages processes and cycles of delivering sanitation solutions that could critically evaluate analyse and provide credible adequate and appropriate sanitation solutions All of which culminates in a strategic and practical application platform called Sanitation 4.0 that advocates for total rejuvenation and comprehensive overhaul with eight key strategic considerations for the implementation Regenerative Sanitation A New Paradigm For Sanitation 4.0 is interdisciplinary and encourages collaboration between engineers scientists technologists social scientists and others to provide effective and practical user centred solutions It includes relevant case studies examples exercise and future research recommendations It is written as both a textbook for researchers and students as well as a practitioners guide for policymakers and professionals

Toilet Adoption in Rural India Saswata Biswas, Indranil De, Gyan Mudra, Deepa Gupta, 2024-03-28 This book examines sanitation and toilet access across rural India focusing on psychological socio cultural infrastructural and normative barriers to the initiative of Swachh Bharat Mission SBM While sketching the evolution of sanitation policies in India it assesses their impact on sanitation behaviour It also studies the implications of variations in caste religion and geography on toilet usage across Indian states By analysing data from various states and intensive micro level studies of three states i.e. rural Bihar Gujarat and Telangana this volume Suggests that socio cultural factors are as significant as economic factors in shaping sanitation behaviour Argues that the concepts of cleanliness and pollution are often determined by the social cultural context rooted in historical events that have shaped traditional beliefs and ideas about space Explores gendered perspectives on the usage of and access to toilets Highlights the limited effectiveness of Information Education and Communication IEC programs in encouraging toilet adoption and emphasizes the need for information dissemination at the ground level Gives recommendations for enhancing the adoption of toilets in rural India

including provision for more than one toilet per household uninterrupted access to water and behavioural change to combat open defecation This book will be useful to students studying sociology psychology social work and development studies It will also be an invaluable companion to NGOs social workers and activists actively involved in water sanitation and hygiene Moreover this book holds immense value as a pivotal resource and point of reference for policymakers engaged in rural development with a specific focus on Sustainable Development Goals

Evolution of Sanitation and Wastewater Technologies through the Centuries Andreas N. Angelakis, Joan B. Rose, 2014-09-14 Most of the technological developments relevant to water supply and wastewater date back to more than to five thousand years ago These developments were driven by the necessity to make efficient use of natural resources to make civilizations more resistant to destructive natural elements and to improve the standards of life both at public and private level Rapid technological progress in the 20th century created a disregard for past sanitation and wastewater and stormwater technologies that were considered to be far behind the present ones A great deal of unresolved problems in the developing world related to the wastewater management principles such as the decentralization of the processes the durability of the water projects the cost effectiveness and sustainability issues such as protection from floods and droughts were intensified to an unprecedented degree New problems have arisen such as the contamination of surface and groundwater Naturally intensification of unresolved problems has led to the reconsideration of successful past achievements This retrospective view based on archaeological historical and technical evidence has shown two things the similarity of physicochemical and biological principles with the present ones and the advanced level of wastewater engineering and management practices Evolution of Sanitation and Wastewater Technologies through the Centuries presents and discusses the major achievements in the scientific fields of sanitation and hygienic water use systems throughout the millennia and compares the water technological developments in several civilizations It provides valuable insights into ancient wastewater and stormwater management technologies with their apparent characteristics of durability adaptability to the environment and sustainability These technologies are the underpinning of modern achievements in sanitary engineering and wastewater management practices It is the best proof that the past is the key for the future Evolution of Sanitation and Wastewater Technologies through the Centuries is a textbook for undergraduate and graduate courses of Water Resources Civil Engineering Hydraulics Ancient History Archaeology Environmental Management and is also a valuable resource for all researchers in the these fields Authors Andreas N Angelakis Institute of Iraklion Iraklion Greece and Joan B Rose Michigan State University East Lansing MI USA

Drinking Water: Principles And Practices Hans J C Van Dijk, Jasper Q J C Verberk, Peter J De Moel, 2006-11-24 This unique volume provides a comprehensive overview of all the major aspects of modern drinking water systems in the western European context It not only covers the theoretical principles but also the historical background and practical aspects of design and operation legislation planning and finance of drinking water supply in its social and economic context

The principles and practices are illustrated using experiences from The Netherlands The Dutch drinking water supply is well known for its multiple barrier systems and high technical standards The Dutch drinking water is of high quality and does not contain chlorine and the Dutch therefore readily drink tap water and do not see the need to buy bottled water or in house filters with their drawbacks on national economics public health and the environment This illustrative overview can be used as a reference for other countries and regions

Rural Sanitation in India Kumar Alok,A.P. Singh,2014-01-01 This book tries to capture 13 case studies from different states of the country covering various aspects of sanitation programme so that the district and state officials are able to draw lessons and improve the programme implementation in their districts The case studies are written by practioners of rural sanitation i e District and State officials and NGOs directly involved in the programme implementation They have tried to discuss the key issues and strategies to overcome challenges citing actual case of the district state The book highlights key learning elements from these case studies which can be used by others in sanitation sector as well as other social development programmes In addition the book offers them the opportunity to learn from the existing experiences in the field and make necessary programmatic improvements
