Bayesian Analysis of Item Response Theory Models Using SAS Clement A. Stone,Xiaowen Zhu,2015-03-01 Written especially for psychometricians scale developers and practitioners interested in applications of Bayesian estimation and model checking of item response theory IRT models this book teaches you how to accomplish all of this with the SAS MCMC Procedure Because of its tutorial structure Bayesian Analysis of Item Response Theory Models Using SAS will be of immediate practical use to SAS users with some introductory background in IRT models and the Bayesian paradigm Working through this book s examples you will learn how to write the PROC MCMC programming code to estimate various simple and more complex IRT models including the choice and specification of prior distributions specification of the likelihood model and interpretation of results Specifically you will learn PROC MCMC programming code for estimating particular models and ways to interpret results that illustrate convergence diagnostics and inferences for parameters as well as results that can be used by scale developers for example the plotting of item response functions In addition you will learn how to compare competing IRT models for an application as well as evaluate the fit of models with the use of posterior predictive model checking methods Numerous programs for conducting these analyses are provided and annotated so that you can easily modify them for your applications

Quantitative Psychology Marie Wiberg,Jee-Seon Kim,2024-06-18 This book includes presentations given at the 88th annual meeting of the Psychometric Society held in Maryland USA on July 24 28 2023 The proceeding covers a diverse set of psychometric topics The topics include but are not limited to item response theory cognitive diagnostic models Bayesian estimation validity and reliability issues and several applications within different fields The authors are from all over the world they work in different psychometrics areas as well as having diverse professional and academic experiences

Statistical Modelling for Evidence-Based Public Health Lawrence N. Kazembe,Tsirizani M. Kaombe,2025-09-26 This book presents a selection of statistical techniques and methods applied to analyze data arising from HIV AIDS epidemiology as well as child and maternal health Evidence based decision making in public health interventions requires appropriate techniques applied to solve relevant statistical and epidemiological questions which would in turn bring out relevant outputs for action The different chapters assembled in this book address various methodological challenges when analyzing HIV AIDS child and maternal health data These include data issues for handling correlated outcomes and repeated measurements generated through longitudinal or follow up processes spatial temporal correlation measurement error missingness co morbidity survival analysis detection of outlying health outcomes and joint occurrences of outcomes Essential approaches that enhance statistical science are presented when dealing with variable and model selection Each chapter motivates the problem provides details of the relevant bio statistical methods used to tackle the problem applies the methods to the data and offers some epidemiological or public health recommendations Readers can replicate the methods to their data and R command codes are supplied at the end of each chapter
