Melancholia Renee Lertzman,2015-06-12 In this groundbreaking book Renee Lertzman applies psychoanalytic theory and psychosocial research to the issue of public engagement and public apathy in response to chronic ecological threats By highlighting unconscious and affective dimensions of contemporary ecological issues Lertzman deconstructs the idea that there is a gap between what people care about and what is actually carried out in policy and personal practice In doing so she presents an innovative way to think about and design engagement practices and policy interventions Based on key qualitative fieldwork and in depth interviews conducted in Green Bay Wisconsin each chapter provides a psychosocial psychoanalytic perspective on subjectivity affect and identity and considers what this means for understanding behaviour in relation to environmental crises and climate change The book argues for a theory of environmental melancholia that accounts for the ways in which people experience profound loss and disruption caused by environmental issues and yet may have trouble expressing or making sense of such experiences Environmental Melancholia offers a fresh perspective to the field of environmental psychology that until now has been largely dominated by research in cognitive behavioural and social psychology It will appeal to academics researchers and postgraduate students in the fields of psychoanalysis psychosocial studies and sustainability as well as policy makers and educators internationally *Little Madnesses* Annette
