**Beyond the Invisible Hand** Kaushik Basu, 2010-10-25 Why economics needs to focus on fairness and not just efficiency One of the central tenets of mainstream economics is Adam Smith's proposition that given certain conditions self interested behavior by individuals leads them to the social good almost as if orchestrated by an invisible hand This deep insight has over the past two centuries been taken out of context contorted and used as the cornerstone of free market orthodoxy In *Beyond the Invisible Hand* Kaushik Basu argues that mainstream economics and its conservative popularizers have misrepresented Smith's insight and hampered our understanding of how economies function why some economies fail and some succeed and what the nature and role of state intervention might be Comparing this view of the invisible hand with the vision described by Kafka in which individuals pursuing their atomistic interests devoid of moral compunction end up creating a world that is mean and miserable Basu argues for collective action and the need to shift our focus from the efficient society to one that is also fair Using analytic tools from mainstream economics the book challenges some of the precepts and propositions of mainstream economics It maintains that by ignoring the role of culture and custom traditional economics promotes the view that the current system is the only viable one thereby serving the interests of those who do well by this system *Beyond the Invisible Hand* challenges readers to fundamentally rethink the assumptions underlying modern economic thought and proves that a more equitable society is both possible and sustainable and hence worth striving for By scrutinizing Adam Smith's theory this impassioned critique of contemporary mainstream economics debunks traditional beliefs regarding best economic practices self interest and the social good

**The Social Licence for Financial Markets** David Rouch,2020-07-13 This book is about what Mark Carney has called the social licence for financial markets and how it can point us towards a more sustainable future Author David Rouch argues that what it reveals contrasts sharply with the usual portrayals of markets as places of unrestrained financial self interest Drawing attention to a more complex reality and the presence of justice focused aspirations in finance can positively impact individual institutional and systemic behaviour change not imposed by regulators but emerging from the very substance of market relationships The finance sector should have a key role in addressing humanity's increasingly pressing sustainability challenges Yet the relationship between finance and society has not recovered from the 2008 crisis and the scandals and austerity that followed The Covid 19 pandemic and its economic fallout is sharpening some of the issues and creating new ones Recognising that financial markets operate subject to a social licence has the potential to galvanise market participants in tackling these challenges strengthening social solidarity on which markets also depend and to provide coordinates for navigating a way through the post pandemic social political and economic landscape

Economic Theory and Policy amidst Global Discontent Ananya Ghosh Dastidar,Rajeev Malhotra,Vivek Suneja,2018-02-06 This book rethinks economic theory and calls for a creative and pragmatic approach to policymaking It examines what development and sustenance of economic progress mean and how these may be facilitated The relevance of this issue has received fresh impetus from the significant changes in the degree and pattern of international economic relations that are unfolding across the world posing both opportunities and challenges While globalisation of goods and financial markets may have delivered high growth for some nations the distribution of the benefits has often been highly unequal with gains to owners of capital and skills being disproportionately higher compared to that of labour especially the unskilled Widening and persistent inequalities have been at the heart of rising polarisation and spread of conflicts that threaten the social fabric This work emphasises the relevance of a broad policy framework based on building individual capabilities and in line with a human centric perspective At the same time it points out the crucial need to create policy space for macroeconomic stability and to accommodate heterodox influences especially when conventional
