Teaching Macroeconomics with Microsoft Excel® Humberto Barreto, 2016-05-23 Humberto Barreto gives professors a simple way to teach fundamental concepts for any undergraduate macroeconomics course using Microsoft Excel with Excel workbooks and add ins and videos freely available on his university website The Excel files are designed to be used by students with any textbook and have been used many times by the author in his own teaching Each Excel workbook contains links to short screencasts around five to ten minutes that show the cursor and typing as the file is manipulated with narration that walks the student through the steps needed to complete a task The book shows professors a simple way to present macroeconomic models and incorporate data into their courses

Mathematical Economics Vasily E. Tarasov, 2020-06-03 This book is devoted to the application of fractional calculus in economics to describe processes with memory and non locality Fractional calculus is a branch of mathematics that studies the properties of differential and integral operators that are characterized by real or complex orders Fractional calculus methods are powerful tools for describing the processes and systems with memory and nonlocality Recently fractional integro differential equations have been used to describe a wide class of economical processes with power law memory and spatial nonlocality Generalizations of basic economic concepts and notions the economic processes with memory were proposed New mathematical models with continuous time are proposed to describe economic dynamics with long memory This book is a collection of articles reflecting the latest mathematical and conceptual developments in mathematical economics with memory and non locality based on applications of fractional calculus

Patentism Replacing Capitalism Samuel Meng, 2019-05-03 Based on economic knowledge and logical reasoning this book proposes a solution to economic recessions and offers a route for societal change to end capitalism The author starts with a brief review of the history of economics and then questions and rejects the trend of recent decades that has seen econometrics replace economic theory By reviewing the different schools of economic thought and by examining the limitations of existing theories to business cycles and economic growth the author forms a new theory to explain cyclic economic growth According to this theory economic recessions result from innovation scarcity which in turn results from the flawed design of the patent system The author suggests a new design for the patent system and envisions that the new design would bring about large economic and societal changes Under this new patent system the synergy of the patent and capital markets would ensure that economic recessions could be avoided and that the economy would grow at the highest speed

Economic Dynamics in Discrete Time Jianjun Miao, 2014-09-12 A unified comprehensive and up to date introduction to the analytical and numerical tools for solving dynamic economic problems This book offers a unified comprehensive and up to date treatment of analytical and numerical tools for solving dynamic economic problems The focus is on introducing recursive methods an important part of every economist s set of tools and readers will learn to apply recursive methods to a variety of dynamic economic problems The book is notable for its combination of theoretical

foundations and numerical methods Each topic is first described in theoretical terms with explicit definitions and rigorous proofs numerical methods and computer codes to implement these methods follow Drawing on the latest research the book covers such cutting edge topics as asset price bubbles recursive utility robust control policy analysis in dynamic New Keynesian models with the zero lower bound on interest rates and Bayesian estimation of dynamic stochastic general equilibrium DSGE models The book first introduces the theory of dynamical systems and numerical methods for solving dynamical systems and then discusses the theory and applications of dynamic optimization The book goes on to treat equilibrium analysis covering a variety of core macroeconomic models and such additional topics as recursive utility increasingly used in finance and macroeconomics dynamic games and recursive contracts The book introduces Dynare a widely used software platform for handling a range of economic models readers will learn to use Dynare for numerically solving DSGE models and performing Bayesian estimation of DSGE models Mathematical appendixes present all the necessary mathematical concepts and results Matlab codes used to solve examples are indexed and downloadable from the book's website A solutions manual for students is available for sale from the MIT Press a downloadable instructor's manual is available to qualified instructors

The Dynamic Macroeconomic Effects of Public Capital Christophe

Kamps,2004-12-22 This book analyzes the dynamic macroeconomic effects of public capital in industrialized countries The issue of whether public capital is productive has received a great deal of recent attention Yet existing empirical analyses have been limited to a small set of countries This book presents a new database that provides internationally comparable capital stock estimates for 22 OECD countries for the 1960-2001 period Building on this database the book estimates the dynamic effects of public capital using a variety of econometric methods The results suggest that public capital is productive in OECD countries on average The theoretical analysis based on a dynamic general equilibrium model shows that the effects of public capital depend crucially on the way the government chooses to finance additional spending
