Independent Power Projects in Developing Countries Henrik M. Inadomi, 2010-01-01 For developing countries a stable and secure supply of electricity is crucial for development and for their populations well being Since the early 1990s the main mechanism for constructing power generation facilities in developing countries has been the independent power project IPP model where a foreign investor enters into long term investment contracts with the national utility This model has succeeded in attracting investment but raises complex regulatory and contractual challenges in addition to public concerns This book drawing on project contracts the author's interview sources case law and literature analyzes in detail the legal investment protection used by IPP investors to ensure sufficient returns and protect their contracted revenue stream The author examines how the model's corporate financial structure interlocks with strong contractual rights and with a number of measures used to improve the host country's creditworthiness in the short and long term including investment guarantees The second part of the book identifies that the IPP model normally leads to six main consequences for the host developing country The IPP model has led to private investment which has increased reliability modernization and introduced private standards It contains an intrinsic structural weakness in times of economic downturns It has shown a tendency to lead to overinvestment in generation capacity It has shown a tendency to lead to expensive and suboptimal solutions regarding choice of design and technology The model and its institutional surroundings contains insufficient disincentives against moral hazard and

exploitative behavior including corruption and The IPP model does not facilitate a further development of the host country's power sector The author argues that these consequences for development can be improved without detrimentally compromising the private sector's willingness to continue to invest While pursuing this analysis the author also explores such issues as the following the web of parties and contracts constituting the IPP model including the model's risk allocation an analysis of political risk including to what extent foreign investors also are protected against commercial and credit risks the competing needs of predictability and flexibility in long term contracts how investment arbitration tribunals have reacted both to the change in macroeconomic circumstances caused by the East Asian Crisis of 1997-98 and to numerable and credible allegations of corruption during procurement identification of factors reducing or increasing the IPP model's tendency to fail during severe economic recessions

A Guide to the Procurement of Privately Financed Projects Douglas Lamb, Tony Merna, 2004-09-27 A guide to the procurement of privately financed projects an indicative assessment of the procurement process outlines the concept of privately financed projects PFP that can be used for both public private and private private interactions Utilising models from many countries the guide develops a robust procurement system applicable to PFP and project finance in both the EU and overseas This guide provides a systematic approach for the preparation and evaluation of privately financed projects PFP and services It is intended to assist both the Principal often a public body and the Promoter private body at each phase of the procurement process from inception through to financial closure Principals using this guide should be able to adapt the private finance procurement process for their specific organisation and business sector Moreover in the case of the promoting organisation the guide provides an appreciation of the steps that occur and the various processes undertaken and the associated costs of bidding A guide to the procurement of privately financed projects an indicative assessment of the procurement process provides an invaluable understanding of the critical facets involved in PFP and suggests frameworks for developing objective orientated procurement elements
