Online Postgraduate Education in a Postdigital World Tim Fawns,Gill Aitken,Derek Jones,2021-12-17 This edited volume builds upon the

premise that online learning is not separate from the social and material world and is made up of embodied socially meaningful experiences. It is founded on a postdigital perspective in which much more than interactions with keyboards, computer screens, hardware or software, the learning that happens on online postgraduate programmes spills out into professional and informal settings, making connections with what comes before and after any formally scheduled tasks. Unlike other books relating to online education, this book combines a theoretical perspective in which the digital, physical and social are all interconnected within complex educational ecologies, with a focus grounded in postgraduate practice. This focus has important implications for the kinds of students and learning that are explored in the chapters of the book. This book provides an important contribution to the knowledge of what is required to produce quality online postgraduate programmes at the level of teachers, curriculum designers, faculty developers and policy makers.

Scaling up Assessment for Learning in Higher Education David Carless, Susan M. Bridges, Cecilia Ka Yuk Chan, Rick Glofcheski, 2016-12-29. A critical issue in higher education is the effective implementation of assessment with the core purpose of promoting productive student learning. This edited collection provides a state of the art discussion of recent cutting edge work into assessment for learning in higher education. It introduces a new theme of scaling up which will be welcomed by theorists, researchers, curriculum leaders and university teachers and showcases the work of leading figures from Australia, England, continental Europe and Hong Kong. The work illuminates four key elements: 1. Enabling assessment change, 2. Assessment for learning strategies and implementation, 3. Feedback for learning, 4. Using technology to facilitate assessment for learning. Solidly research based and carrying important implications for enhanced practice in assessment for learning at the university level, it is a must read for academic developers, researchers, university teachers, academic leaders and all those interested in assessment matters.

AI Approaches to Literacy in Higher Education Eybers, Oscar, Oliver, Muller, Alan, 2024-05-01. The ongoing struggle to increase literacy within our population is one of the defining goals of education. Educational environments continue to incorporate more and more technology into their cache of necessary tools as the lives of their students depend on these devices at a growing rate. Artificial intelligence (AI) and literacy education are bound to face a convergence that will be a transformative force. AI Approaches to Literacy in Higher Education delves into the synergies between advanced technology and the cultivation of literacy skills, illuminating innovative methodologies and applications that redefine educational paradigms. This book is a comprehensive analysis of AI's potential to elevate literacy among higher education students. The book strategically integrates research studies, case analyses and theoretical perspectives to construct a nuanced understanding of AI's role in shaping literacy outcomes. This work uncovers the intricate interplay between technology and academic literacy by utilizing a tapestry of AI-driven tools, strategies and techniques. Educators, researchers, instructional designers and higher education professionals will find this book invaluable.
