Technology-Supported Learning In and Out of the Japanese Language Classroom Erica Zimmerman, Abigail McMeekin, 2019-05-10 This book addresses several pressing concerns of teachers and researchers who are looking for ways to integrate technology use in and out of their classrooms and assess its usefulness in the learning process. It provides an up-to-date examination of technology-supported pedagogy and language acquisition in a variety of Japanese as a foreign or second language contexts. It equips readers with practical pedagogical information, including methods of implementation and learning assessment, and ideas for how technology can be applied to achieve a wide range of learning objectives. The topics examined include cultural learning, identity construction, speaking, reading, writing, pronunciation, collaborative online learning, digital and 3D virtual reality, games, online text analysis, and participation in online communities. In addition, different e-learning configurations such as flipped online and distance learning classrooms are explored. Studies examine various current technologies, e.g., blogs, synchronous/asynchronous telecollaboration, corpus analysis software, modern pronunciation tools, and will have both direct and indirect consequences for teaching and learning a second foreign language with technology across all languages. *Uncover Level 1 Student's Book* Ben Goldstein, Ceri Jones, 2015-02-15 Uncover a whole new world.
