

Water Piping Guidelines

NOTICE : If using mixing valves on the outlet, choose one which prevents cold water pressure from overcoming hot water line pressure.
 The flow rate of hot water may vary when more than two faucets(appliances, fixtures, etc.) are being used simultaneously.
 If a water heater is installed in a closed water supply system, such as one having a backflow preventer in the cold water supply line, means shall be provided to control thermal expansion device. Contact the water supplier or local plumbing inspector on how to control this situation.
