Bioinformatics Christine Orengo, David Jones, Janet Thornton, 2003-12-16 Bioinformatics the use of computers to address biological questions has become an essential tool in biological research It is one of the critical keys needed to unlock the information encoded in the flood of data generated by genome protein structure transcriptome and proteome research Bioinformatics Genes Proteins Computers covers both the more traditional approaches to bioinformatics including gene and protein sequence analysis and structure prediction and more recent technologies such as datamining of transcriptomic and proteomic data to provide insights on cellular mechanisms and the causes of disease

Bioinformatics Christine Orengo, David T. Jones, Janet M. Thornton, 2003-01 This title describes the development and use of computational and mathematical methods for the acquisition archiving analysis and interpretation of biological detail It details traditional approaches as well as recent technological advances

Molecular Toxicology Nick Plant, 2003 Molecular Toxicology is a concise introduction to the subject taking the reader through the theoretical principles of toxicology followed by specific examples In the first section the concepts behind possible mechanisms of toxicity are described e g the specific enzyme or receptor system using examples where appropriate Following this a series of examples are used to show the extension of concept into the real world in an organ specific manner The book concludes with a section outlining toxicity assessment methods where the impact of molecular biology is having a considerable impact including DNA microarrays proteomics and bioinformatics

Information Resources in Toxicology P.J. Bert Hakkinen, Asish Mohapatra, Steven G. G. Gilbert, 2009-08-19 This latest version of Information Resources in Toxicology IRT continues a tradition established in 1982 with the publication of the first edition in presenting an extensive itemization review and commentary on the information infrastructure of the field This book is a unique wide ranging international annotated bibliography and compendium of major resources in toxicology and allied fields such as environmental and occupational health chemical safety and risk assessment Thoroughly updated the current edition analyzes technological changes and is rife with online tools and links to Web sites IRT IV is highly structured providing easy access to its information Among the hot topics covered are Disaster Preparedness and Management Nanotechnology Omics the Precautionary Principle Risk Assessment and Biological Chemical and Radioactive Terrorism and Warfare are among the designated International in scope with contributions from over 30 countries Numerous key references and relevant Web links Concise narratives about toxicologic sub disciplines Valuable appendices such as the IUPAC Glossary of Terms in Toxicology Authored by experts in their respective sub disciplines within toxicology
