Taylor, 2003-12 This book is an attempt to answer the most popular question asked by students in this course The best way that the authors have found to demonstrate to students the need to learn certain topics is to bring pages from a real K 8 textbook This allows students to see when and where a topic occurs in the curriculum and also to see how it is presented in a text Thus each topic in this book has four components a brief discussion of the topic pages from a school text a set of problems that focus on skills and a set of problems that focus on concepts The topics are arranged as you find them in most MET books The topics that are presented in the manual are those with which students usually have the most trouble Mathematics for Elementary Teachers with Activities Sybilla Beckmann, 2014 Rev ed of Mathematics for elementary teachers with activity manual 3rd ed c2011
