Tourism Supply Chain Management Haiyan Song,2012-03-12 Fierce global competition in the tourism industry is now focused on integral parts of supply chains rather than on individual firms. The highly competitive environment has forced tourism firms to look for ways to enhance their competitive advantage. Tourism products are often viewed by consumers as a value-added chain of different service components, and identifying ways to effectively manage the interrelated tourism business operations will enable tourism firms to better meet customer needs and accomplish business goals, thus maintaining competitive advantage over their equally efficient rivals. This significant and timely volume is the first to apply supply chain management theories and practices in the context of tourism. By doing so, the book offers insight into the relationships between tourism enterprises, how coordination across organizations can be effectively achieved, and how business performance can be improved. It provides comprehensive and systematic coverage of modern supply chain management concepts and methodologies applied to the tourism and hospitality industries. The text covers key issues and principles, including marketing and product development, demand forecasting, supplier selection and management, distribution channels, capacity management, customer relationship management, tourism supply chain competition and coordination, and e-tourism. The book combines essential theory and comparative international examples based on primary research to show challenges and opportunities of effective tourism supply chain management. This text is essential for final year undergraduate and postgraduate students studying Tourism Management, Tourism Planning, and Tourism Economics.

Advanced Manufacturing and Automation VII Kesheng Wang, Yi Wang, Jan Ola Strandhagen, Tao Yu,2018-02-10 The proceedings bring together a selection of papers from the 7th International Workshop of Advanced Manufacturing and Automation IWAMA 2017 held in Changshu Institute of Technology, Changshu, China, on September 11-12, 2017. Most of the topics are focusing on novel techniques for manufacturing and automation in Industry 4.0. These contributions are vital for maintaining and improving economic development and quality of life. The proceedings will assist academic researchers and industrial engineers to implement the concepts and theories of Industry 4.0 in industrial practice in order to effectively respond to the challenges posed by the 4th industrial revolution and smart factories.
