Summarization Inderjeet Mani, Mark T. Maybury, 1999 Natural Language Processing for Online Applications Peter Jackson, Isabelle Moulinier, 2007 This text covers the technologies of document retrieval information extraction and text categorization in a way which highlights commonalities in terms of both general principles and practical concerns It assumes some mathematical background on the part of the reader but the chapters typically begin with a non mathematical account of the key issues Current research topics are covered only to the extent that they are informing current applications detailed coverage of longer term research and more theoretical treatments should be sought elsewhere There are many pointers at the ends of the chapters that the reader can follow to explore the literature However the book does maintain a strong emphasis on evaluation in every chapter both in terms of methodology and the results of controlled experimentation

Information Retrieval Technology Sung Hyon Myaeng, Ming Zhou, Kam-Fai Wong, Hong-Jiang Zhang, 2007-05-25 The Asia Information Retrieval Symposium AIRS was established by the Asian information retrieval community after the successful series of Information retrieval with Asian Languages IRAL workshops held in six different locations in Asia starting from 1996 While the IRAL workshops had their focus on information retrieval problems involving Asian languages AIRS covers a wider scope of applications systems technologies and theory aspects of information retrieval in text audio image video and

multimedia data This extension of the scope reflects and fosters increasing research activities in information retrieval in this region and the growing need for collaborations across subdisciplines We are very pleased to report that we saw a sharp increase in the number of submissions and their quality compared to the IRAL workshops We received 106 papers from nine countries in Asia and North America from which 28 papers (26%) were presented in oral sessions and 38 papers in poster sessions (36%) It was a great challenge for the Program Committee to select the best among the excellent papers The low acceptance rates witness the success of this year's conference After a long discussion between the AIRS 2004 Steering Committee and Springer the publisher agreed to publish our proceedings in the Lecture Notes in Computer Science LNCS series which is SCI indexed We feel that this strongly attests to the excellent quality of the papers Proceedings of the Tenth International Symposium on Applied Electromagnetic and Mechanics T. Takagi, 2003 This publication covers topics in the area of applied electromagnetics and mechanics Since starting in Japan in 1988 the ISEM has become a well known international forum on applied electromagnetics
