Adventures With A Microscope:

Adventures with a Microscope Richard Headstrom, 1977-06 Outlines fifty nine microscope projects in addition to presenting a brief history of the microscope a list of useful laboratory supplies and close up drawings of objects suggested for examination **Adventures with a Microscope** Ronald Peter Grice, Alan Sydney Myers, 1967 **Adventures with the**

Microscope Julian Dana Corrington, 1934 **Pippa's Progress. First Adventures with a Microscope for Children** Mol Smith, 2014-08-19 Children get microscopes as presents normally for birthdays or Christmas Parents and relatives think the microscope will give a new perspective to the child's growing awareness The knowing ones will also realise guidance is required by way of a book Unfortunately most books fail to connect with a child living in this fast paced and ever faster changing world Most of them on the market are already out of date or are simply legacies of an age long gone I believe microscopy and using a microscope will add to a young person's life but not without the right kind of help This book is quite different and aimed at both inspiring the young person and connecting with them in their world of now It's not filled with images of this wow thing or that life form It is filled with things they can actually do It is not about sitting in the dark looking down a microscope for hours on end like children sit in their bedrooms with their huddls or ipads playing endless games It is about less screen time and more about them looking around themselves in a fun and vibrant way Pippa is a real twelve year old young woman who understands the world your child is evolving in She speaks to your child in their language and with a mind aligned to her generation She has great morals and a distinct positive message behind her love of microscopy and life itself Her adventures fit well with children aged six to twelve She introduces modern practical ways to use a microscope collect things to see and easy do able projects on how to make slides from using safe materials easily obtained from local supermarkets and shops The book is supported by online videos in HD ad free formats which accentuate learning by doing and involves young people in real science without boring them Educational and fun Practical and informed but not lecturing Pippa's Progress provides the perfect first guide on exploring the tiny world which impacts on every aspect of our lives All of the images of microscopic subjects in the book were taken via a basic microscope and are therefore exactly what your child will see through a budget priced microscope Only microscopes affordable to young people were used by Pippa in her adventures Many books show pictures of micro life which suggest these things are viewable using an optical microscope which will disappoint and put young people off when they can't see the same Pippa's Progress first adventures will take any young person on a proper and rewarding journey and is the only real guide designed to achieve this by people already there enjoying the journey **Adventures with a Hand Lens [Illustrated Edition]** Richard Headstrom, 2024-04-08 Includes over 200 illustrations by the author Here are fifty adventures that any of us could have The only equipment needed is a hand lens and an inquiring mind At home in the woods fields ponds and along the roadside are familiar things that under the glass show us exciting and sometimes beautiful details that we could not see without this help Have you ever looked at the

antennae of an ant under a lens or seen the bristles on an earthworm Did you know that a certain moss has a capsule that looks like a pepper box A piece of granite seen through a glass shows us that it is made up of various crystals These are the kinds of things that an adventurer with a hand lens can discover Not only has the author described these experiments in lively and clear text but he has illustrated them with over two hundred line drawings *Catalog of Copyright Entries. Third Series* Library of Congress. Copyright Office,1967 Includes Part 1 Number 2 Books and Pamphlets Including Serials and Contributions to Periodicals July December **Popular Science** ,1934-07 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Books for Young People** ,1929 **Homeschooling for Excellence** David Colfax,Micki Colfax,2009-05-30 Break away from the failings of schools and embrace the power of homeschooling through the guidance of the Colfax family s teachings For over fifteen years David and Micki Colfax educated their children at home They don t think of themselves as pioneers though that s what they became Unhappy with the public schools the Colfaxes wanted the best education possible for their four sons a program for learning that met the evolving needs of each child and gave them complete control of how and what their children learned The results A prescription for excellence Harvard educations for their sons Grant Drew and Reed Their fourth son is still too young for college Now the Colfaxes tell how all parents can become involved in homeschooling In a straight talking book that reads like a frank conversation among friends they tell what they did and how they did it their educational approaches the lessons they learned and what materials books equipment educational aids proved most useful over the years Best of all they show you how you can take charge of your children s education in an invaluable sourcebook that will help you find a rewarding and successful alternative to our failing schools Substitutes Harry Bennett,1933
