Dining with Madmen Thomas Fahy, 2019-02-13 In *Dining with Madmen* Fat Food and the Environment in 1980s Horror author Thomas Fahy explores America's preoccupation with body weight processed foods and pollution through the lens of horror. Conspicuous consumption may have communicated success in the eighties but only if it did not become visible on the body. American society had come to view fatness as a horrifying transformation it exposed the potential harm of junk food gave life to the promises of workout and diet culture and represented the country's worst consumer impulses inviting questions about the personal and environmental consequences of excess. While changing into a vampire or a zombie often represented widespread fears about addiction and overeating it also played into concerns about pollution. Ozone depletion acid rain and toxic waste already demonstrated the irrevocable harm being done to the planet. The horror genre from *A Nightmare on Elm Street* to *American Psycho* responded by presenting this damage as an urgent problem and through the sudden violence of killers vampires and zombies it depicted the consequences of inaction as terrifying. Whether through Hannibal Lecter's cannibalism a vampire's thirst for blood in *The Queen of the Damned* and *The Lost Boys* or an overwhelming number of zombies in George Romero's *Day of the Dead* 1980s horror uses out of control hunger to capture deep seated concerns about the physical and material consequences of unchecked consumption. Its presentation of American appetites resonated powerfully for audiences preoccupied with body size food choices and pollution. And its use of bodily change alongside the bloodlust of killers and the desolate landscapes of apocalyptic fiction demanded a recognition of the potentially horrifying impact of consumerism on nature society and the self.

Realty and Building, 1989-07 *Cincinnati Magazine*, 2004-01 *Cincinnati Magazine* taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region.

Prehistoric Alex Wong, 2023-10-24 The improbable story of the birth of modern day pro basketball in Toronto. In just over 25 years the Toronto Raptors have evolved from an intrepid expansion team to an NBA champion. But for all the triumphs of the past decade the beginning looked a bit different. When the franchise began its first season in 1995 a pro basketball team in Toronto was viewed as an experiment. There was no playbook to follow and very few people gave them a chance to succeed. In *Prehistoric* irreverent Raptors voice and culture writer Alex Wong explores the franchise's fascinating and unconventional inception through 140 original interviews with those involved with the team's very beginning examining the process of how the team came up with their name and logo inspired by the blockbuster film *Jurassic Park* taking a behind the scenes look at the drafting of star point guard Damon Stoudamire telling the backstories of a group of misfits who formed the first year roster and providing an in depth look at the team's opening night victory at the SkyDome and the expansion franchise's signature win over Michael Jordan and a 72 win Chicago Bulls team. The Raptors boldly and intentionally pursued a much different audience in a hockey first town. The result is a team who went through the necessary growing pains and eventually captured the heart of a city as told in this essential
