A General Theory of Institutional Change Shipping Tang, 2017-07-05 Institutional change is a central driving force behind social changes and thus a central topic in all major fields of social sciences Yet no general theory of institutional change exists Drawing from a diverse literature this book develops a general theory of institutional change based on a social evolutionary synthesis of the conflict approach and the harmony approach The book argues that because the whole process of institutional change can be understood as a process of selecting a few ideas and turning them into institutions competition of ideas and struggle for power to make rules are often at the heart of institutional change The general theory not only integrates more specific theories and insights on institutional change that have been scattered in different fields into a coherent general theory but also provides fundamental new insights and points to new directions for future research This book makes a fundamental contribution to all major fields of social sciences sociology sociological theory political sciences institutional economics and political theory It should be of general interest to scholars and students in all major fields of social science

Security, Identity and Interests Bill McSweeney, 1999-11-04 Bill

McSweeney addresses the central problem of international relations security and constructs a novel framework for its analysis He argues for the unity of the interpersonal societal and international levels of human behaviour and outlines a concept of security which more adequately reflects the complexity and ambiguity of the topic This book introduces an alternative way of theorizing the international order within which the idea of security takes on a broader range of meaning inviting a more critical and interpretative approach to understanding the concept and formulating security policy The recent shift to sociology in international relations theory has not as yet realized its critical potential for the study of security

Drawing on contemporary trends in social theory Dr McSweeney argues that human agency and moral choice are inherent features of the construction of the social and thus international order and hence of our conception of security and security policy

The Deliverance of God Douglas A. Campbell, 2009-08-07 This book breaks a significant impasse in much Pauline interpretation pushing beyond both Lutheran and New perspectives on Paul to a non contractual apocalyptic reading of many of the apostle's most famous and most troublesome texts His strongly antithetical vision identifies participation in Christ as the sole core of Pauline theology and produces the most radical rereading of Romans 1-4 for more than a generation Even those who disagree will be forced to clarify their views as never before

Migration and New International Actors

Maria Eugenia Cruset, 2011-10-18 Recent studies on migration have been given a new focus and theoretical framework The so called political dimension of Diasporas and their action at the international level as agents of para diplomacy as well as the introduction of analysis of the trans national character of the migratory phenomenon allow us to dig deeply into the field of our investigations taking us out of the narrow frame of the Nation State

Cockerham, 2013-04-03 This book provides readers with a single source reviewing and updating sociological theory in medical or health sociology The book not only addresses the major theoretical approaches in the field today it also identifies the future directions these theories are likely to take in explaining the social processes affecting health and disease Many of the chapters are written by leading medical sociologists who feature the use of theory in their everyday work including contributions from the original theorists of fundamental causes health lifestyles and medicalization Theories focusing on both agency and structure are included to provide a comprehensive account of this important area in medical sociology

Minority Issues in Europe: Rights, Concepts, Policy Tove H. Malloy, 2013-10-16 Minorities have been part of European history and politics since the middle of the 16th Century often seen as obstacles to state building and later as a threat to nation building Traditional minorities have had to fight their own way to be able to remain in their homelands while

new arrivals have been met with rejection and were expected to return home Minorities are still seen as a threat to peace and security and mostly as outsiders In the early 21st Century of inter connected societies minorities are more than ever an issue often seen as a threat to social cohesion This book provides the advanced student with a multi disciplinary informed perspective on minority history and politics as well as social and cultural issues related to minority identity and minority existence in Europe **Studia Patristica** Jane Baun,M. Edwards,Markus Vinzent,2010 Papers presented at the Fifteenth International Conference on Patristic Studies held in Oxford 2007 see also Studia Patristica 44 45 46 48 and 49 The successive sets of Studia Patristica contain papers delivered at the International Conferences on Patristic Studies which meet for a week once every four years in Oxford they are held under the aegis of the Theology Faculty of the University Members of these conferences come from all over the world and most offer papers These range over the whole field both East and West from the second century to a section on the Nachleben of the Fathers The majority are short papers dealing with some small and manageable point they raise and sometimes resolve questions about the authenticity of documents dates of events and such like and some unveil new texts The smaller number of longer papers put such matters into context and indicate wider trends The whole reflects the state of Patristic scholarship and demonstrates the vigour and popularity of the subject
