Time in Maps Kären Wigen, Caroline Winterer, 2020-11-20 As wide ranging imaginative and revealing as the maps they discuss these essays track how maps interpreted broadly convey time as well as space Richard White Stanford University Maps organize us in space but they also organize us in time Looking around the world for the last five hundred years Time in Maps shows that today's digital maps are only the latest effort to insert a sense of time into the spatial medium of maps Historians Kären Wigen and Caroline Winterer have assembled leading scholars to consider how maps from all over the world have depicted time in ingenious and provocative ways Focusing on maps created in Spanish America Europe the United States and Asia these essays take us from the Aztecs documenting the founding of Tenochtitlan to early modern Japanese reconstructing nostalgic landscapes before Western encroachments to nineteenth century Americans grappling with the new concept of deep time The book also features a defense of traditional paper maps by digital mapmaker William Rankin With more than one hundred color maps and illustrations Time in Maps will draw the attention of anyone interested in cartographic history

Discovering and Using Historical Geographic Resources on the Web Eva H. Dodsworth, L. W. Laliberté, 2014-06-12 Historical geographic material like maps plans and air photos although collected and persevered by libraries archives and other heritage organizations are often hidden from the general public They can be difficult to find access and use Fortunately these caches of cartographic gems have been recognized and valued for their significant contribution to research As a result many of these collections have been recently digitized and made available to the public directly and freely online Acting as a comprehensive guide to online historical cartographic and other visual resources Discovering and Using Historical Geographic Resources on the Web provides library and archival staff and their users with information on how to locate interpret understand and use these resources Even for experts this book can serve as a handy reference that summarizes the different types of maps published providing comprehensive lists of where to access them This book is written for all library staff members who answer reference questions and provide library instruction and for those who are interested in digitizing their own cartographic collections It will also attract history buffs and scholars in environmental studies history earth sciences anthropology and more
