Maines, 2009-08-01 Rachel P Maines s latest work examines the rise of hobbies and leisure activities in Western culture from antiquity to the present day As technologies are hedonized consumers find increasing pleasure in the hobbies associated tools methods and instructional literature Work once essential to survival and comfort gardening hunting cooking needlework home mechanics and brewing have gradually evolved into hobbies and recreational activities As a result the technologies associated with these pursuits have become less efficient but more appealing to the new class of leisure artisans Maines interprets the growth and economic significance of hobbies in terms of broad consumer demand for the technologies associated with them Hedonizing Technologies uses bibliometric and retail census data to show the growth in world markets for hobby craft tools books periodicals and materials

from the late 18th century to today The book addresses basic issues in the history of labor and industry and makes an original contribution to the discussion of how technology and people interact Stitching the World: Embroidered Maps and Women's Geographical Education Judith A. Tyner, 2016-12-05 From the late eighteenth century until about 1840 schoolgirls in the British Isles and the United States created embroidered map samplers and even silk globes Hundreds of British maps were made and although American examples are more rare they form a significant collection of artefacts Descriptions of these samplers stated that they were designed to teach needlework and geography The focus of this book is not on stitches and techniques used in drafting the maps but rather why they were developed how they diffused from the British Isles to the United States and why they were made for such a brief time The events of the late eighteenth and early nineteenth centuries stimulated an explosion of interest in geography The American and French Revolutions the wars between France and England the War of 1812 Captain Cook's voyages and the explorations of Lewis and Clark made the study of places exciting and important Geography was the first science taught to girls in school This period also coincided with major changes in educational theories and practices especially for girls and this book uses needlework maps and globes to chart a broader discussion of women's geographic education In this light map samplers and embroidered globes represent a transition in women's education from accomplishments in the eighteenth century to challenging geographic education and conventional map drawing in schools and academies of the second half of the nineteenth century There has been little serious study of these maps by cartographers and moreover historians of cartography have largely neglected the role of women in mapping Children's maps have not been studied although they might have much to offer about geographical teaching and perceptions of a period and map samplers have been dismissed because they are the work of schoolgirls Needlework historians likewise have not done in depth studies of map samplers until recently Stitching the World is an interdisciplinary work drawing on cartography needlework and material culture This book for the first time provides a critical analysis of these artefacts showing that they offer significant insights into both eighteenth and nineteenth century geographic thought and cartography in the USA and the UK and into the development of female education Findings Mary Carolyn Beaudry, 2006-01-01 Mary C Beaudry mines archaeological findings of sewing and needlework to discover what these small traces of female experience reveal about the societies and cultures in which they were used Beaudry's geographical and chronological scope is broad she examines sites in the United States and Great Britain as well as Australia and Canada and she ranges from the Middle Ages through the Industrial Revolution The author describes the social and cultural significance of findings pins needles thimbles scissors and other sewing accessories and tools Through the fascinating stories that grow out of these findings Beaudry shows the extent to which such small things were deeply entrenched in the construction of gender personal identity and social class The Annotated Emma Jane Austen, David M. Victorian Paper Art and Craft Deborah

Lutz,2022-09-22 This book shows how authors in nineteenth century Britain used the materials of writing and of reading drawing and handicraft for inspiration and creative composition In doing so it reshapes the sensory history of working on and with paper These activities were many and varied Charlotte Bront composed poems and doodled in the margins of school books George Eliot recorded writing ideas on her blotter Elizabeth Barrett Browning sewed paper to paper to edit her poems and Jane Austen employed straight pins to cut and paste Albums provided a playful space to collect and to produce text and collage gifts for friends circumventing print culture for a more intimate book making as Elizabeth Gaskell and Anna Atkins

knew Notebooks and commonplace books were vital to Eliot Michael Field and Emily Bront as part of a writing process Writers experimented with crafts and needlework to compose text without paper and ink most notably in the case of samplers What writing and drawing happened on including bibles sewing patterns and walls mattered as related to and generative of the themes of the work This expansive field of meanings that creativity with textual and material things could have was common to the Victorians but the writers explored here were extravagant even among their self reflexive contemporaries in their undoing remaking miniaturizing encrypting reusing and transforming The edge of the page the width of the margin the covers of the book were limiting factors but also provocations to push on further be radical *The Annotated Mansfield Park* Jane Austen, 2017-04-18 From the editor of the popular Annotated Pride and Prejudice comes an annotated edition of Jane Austen s Mansfield Park that makes her story of an impoverished girl living with her wealthy relatives an even more satisfying read Here is the complete text of Austen s own favorite novel with more than 2 300 annotations on facing pages including Explanations of historical context Citations from Austen s life letters and other writings Definitions and clarifications Literary comments and analysis Maps of places in the novel An introduction bibliography and detailed chronology of events More than 225 informative illustrations Filled with fascinating details about the characters clothes houses and carriages as well as background information on such relevant issues as career paths in the British navy contemporary attitudes toward slavery and the legal and social consequences of adultery David M Shapard s Annotated Mansfield Park brings Austen s world into richer focus
