Antitrust Consent Decrees In Theory And Why Less Is More:

Antitrust Consent Decrees in Theory and Practice Richard A. Epstein, 2007 This book is the first systematic study of the use and effectiveness of the antitrust consent decree in the federal enforcement of antitrust laws *Competition Law and Policy in Latin America* Eleanor Fox, Daniel Sokol, 2009-08-05 This book offers an unparalleled analysis of the emerging law and economics of competition policy in Latin America Nearly all Latin American countries now have competition laws and agencies to enforce them Yet these laws and agencies are relatively young The relative youth of Latin American competition agencies and the institutional and political environment in which they operate limit the ability of agencies to effectively address anti competitive conduct Competition policy is a tool to overcome anti market traditions in Latin America Effective competition policy is critical to assisting in the growth of Latin American economies their global competitiveness and improving the welfare of domestic consumers This book provides new region specific insights on how to better achieve these aims This authoritative volume will be of particular interest to competition agencies academics in law economics and Latin American Studies practitioners around the world in the areas of antitrust and competition policy policymakers and journalists

Cambridge Yearbook of European Legal Studies, Vol 16 2013-2014 Albertina Albors-Llorens, Kenneth Armstrong, Markus Gehring, 2015-01-22 The Cambridge Yearbook of European Legal Studies provides a forum for the scrutiny of significant issues in EU Law the law of the European Convention on Human Rights and Comparative Law with a European dimension and particularly those issues which have come to the fore during the year preceding publication The contributions appearing in the collection are commissioned by the Centre for European Legal Studies CELS Cambridge a research centre in the Law Faculty of the University of Cambridge specialising in European legal issues The papers presented are at the cutting edge of the fields which they address and reflect the views of recognised experts drawn from the University world legal practice and the institutions of both the EU and its Member States Inclusion of the comparative dimension brings a fresh perspective to the study of European law and highlights the effects of globalisation of the law more generally and the resulting cross fertilisation of norms and ideas that has occurred among previously sovereign and separate legal orders The Cambridge Yearbook of European Legal Studies is an invaluable resource for those wishing to keep pace with legal developments in the fast moving world of European integration Collective Management of Music Copyright Qinqing Xu, 2023-04-17 Two of the objectives of the Chinese Copyright Law are to protect the copyright of authors to their literary and artistic works and encourage the creation and dissemination of works In practice however in spite of the existence of the Music Copyright Society of China MCSC that was established to assist with exercising copyright music creators in China remain in need of help to protect and manage their fragmented copyright The MCSC was the first collective management organisation CMO in mainland China and is the only CMO in the field of musical works While there is a large music industry and copyright business in China the MCSC only had 11 356 members at the end of 2021 The third amendment of the Chinese Copyright

Law was initiated in 2011 and came into effect in June 2021 after a long debate for almost ten years. The discussion of the third amendment has highlighted the controversial topic of collective management of copyright. This book explores the adequacy of the MCSC as an intermediary representing rights for music creators. The main argument developed in this study is that the work of the MCSC for individual composers and lyricists is hampered by shortcomings in the regulatory regime as well as by a lack of members' rights to participate in the management of their own rights and by the ineffective international cooperation between the MCSC and other musical CMOs overseas. The analysis is undertaken through a case study approach comparing the collective management systems of music copyright in China, the United States and Australia and addressing the question of how musical CMOs operate in these countries. Specifically, three perspectives are examined: the regulatory systems designed to limit the misuse of those CMOs' monopoly members' rights in the organisations and international cooperation between these CMOs. Overall, the main findings of this book suggest that the MCSC in China could work more effectively to protect music creators' interests. In contrast, although the operational frameworks of the American Society of Composers, Authors and Publishers (ASCAP) and the Broadcast Music Inc. (BMI) in the United States and the Australasian Performing Right Association (APRA) in Australia are not perfect models, the systems in these two countries may at least provide reference points for potential improvement of the regime of the MCSC. The research recommends three courses of action: strengthening the regulatory design overseeing the MCSC's monopoly; clarifying the relationship between the MCSC and its members; while providing the members with the right to manage their own copyright and improving the international cooperation between the MCSC and CMOs in other countries.

Market Design Powers of the European Commission? Korbinian Reiter, 2020-02-06. This book provides a comprehensive analysis of the remedies practice the European Commission has adopted on the basis of articles 7 and 9 of regulation 1/2003. Using article 7 as a normative benchmark, it shows that most of the criticism levelled at the Commission's article 9 decisions and the *Alrosa* judgment of the CJEU is not justified since critics tend to overstate both the rigour of article 7 and the laxness of article 9. Remaining inconsistencies between the commitment practice and the standards for infringement decisions can, it is submitted, be justified by the consensual nature of commitment decisions and their underlying goal of procedural economy. Moreover, it is suggested that too little importance is generally assigned to the beneficial effect which commitments bring about by providing for precise and enforceable obligations without sacrificing the concerned undertakings' freedom to choose how to put the infringement to an end. Adopting a case-oriented approach, this study provides valuable insights for academics and practitioners alike.

Competition Law and Economic Regulation

Niamh Dunne, 2015-03-26 Niamh Dunne undertakes a systematic exploration of the relationship between competition law and economic regulation as legal mechanisms of market control Beginning from a theoretical assessment of these legal instruments as discrete mechanisms the author goes on to address numerous facets of the substantive interrelationship between competition law and economic regulation She considers amongst other aspects the concept of regulatory competition law deregulation liberalisation and regulation for competition the concurrent application of competition law in regulated markets and relevant institutional aspects including market study procedures the distribution of enforcement powers between competition agencies and sector regulators and certain legal powers that demonstrate a hybridised quality lying between competition law and economic regulation Throughout her assessment Dunne identifies and explores recurrent considerations that inform and shape the optimal relationship between these legal mechanisms within any jurisdiction

Competition Law and Economics Abel Moreira Mateus, Teresa Coelho Moreira, 2010-01-01 Mateus and Moreira present a formidable review of pressing issues in competition law and economics Top officials judges and experts from Europe and North America offer their insights into analytical issues practical problems for companies enforcers and complainants and on the state of trans Atlantic divergence and convergence The discussion on national champions and state aid is prescient Throughout the analysis is acute cutting edge and deep Officials counsel and scholars will draw from this fabulous book for years to come Philip Marsden British Institute of International and Comparative Law London UK Competition policy is at a crossroads on both sides of the Atlantic In this insightful book judges enforcers and academics in law and economics look at the consensus built so far and clarify controversies surrounding the issue There is broad consensus on the fight against cartels with some countries criminalizing this type of agreement However there is also wide debate on the questions of monopolization and abuse of dominant position vividly highlighted by the recent Microsoft case Furthermore there are today diverging views on the interplay of business strategies and the control of market power on both a national and international scale The book discusses the perennial issue in Europe of the conflicts between competition and industrial policies once again bringing the theme of national champions to the fore The contributing authors provide opinion on the efforts which have been made towards modernization in both the USA and the EU Featuring new contributions by leading scholars and practitioners in antitrust this book will be a great resource for antitrust enforcers competition lawyers and practitioners and competition economists as well as scholars and graduate students in antitrust and competition law

Economic Facts and Fallacies Thomas Sowell, 2011-03-22 Thomas Sowell both surprises and overturns received wisdom in this indispensable examination of widespread economic fallacies. The Economist Economic Facts and Fallacies exposes some of the most popular fallacies about economic issues and does so in a lively manner and without requiring any prior knowledge of economics by the reader. These include many beliefs widely disseminated in the media and by politicians such as mistaken ideas about urban problems, income differences, male/female economic differences, as well as economic fallacies about academia, about race, and about Third World countries. One of the themes of Economic Facts and Fallacies is that fallacies are not simply crazy ideas but in fact have a certain plausibility that gives them their staying power and makes careful examination of their flaws both necessary and important, as well as sometimes humorous. Written in the easy-to-follow style of the author's Basic Economics, this latest book is able to go into greater depth with real-world examples on specific issues.
