Chinese Environmental Governance Bingqiang Ren, 2013-12-05 In this edited volume leading environmental policy experts from China USA and Europe provide a contemporary view of Chinese environmental policy analyzing current discussions among various actors and agencies The book covers a wide range of topics including the gap between national policy goals and their local implementation cultural and social factors shaping political behavior legal and political systems affecting environmental policy creation and execution new societal forces participating in environmental policymaking and governance and local state strategies tasked with navigating a mix of political legal and societal forces Featuring in depth empirically grounded analyses with interdisciplinary approaches the book is ideal reading for scholars interested in the complex nature of balancing Chinese environmental sustainability and economic growth

Novel Ecosystems Richard J. Hobbs, Eric S. Higgs, Carol Hall, 2013-01-07 Land conversion climate change and species invasions are contributing to the widespread emergence of novel ecosystems which demand a shift in how we think about traditional approaches to conservation restoration and environmental management They are novel because they exist without historical precedents and are self sustaining Traditional approaches emphasizing native species and historical continuity are challenged by novel ecosystems that deliver critical ecosystem services or are simply immune to practical restorative efforts Some fear that by raising the issue of novel ecosystems we are simply paving the way for a more laissez faire attitude to conservation and restoration Regardless of the range of views and perceptions about novel ecosystems their existence is becoming ever more obvious and prevalent in today's rapidly changing world In this first comprehensive volume to look at the ecological social cultural ethical and policy dimensions of novel ecosystems the authors argue these altered systems are overdue for careful analysis and that we need to figure out how to intervene in them responsibly This book brings together researchers from a range of disciplines together with practitioners and policy makers to explore the questions surrounding novel ecosystems It includes chapters on key concepts and methodologies for deciding when and how to intervene in systems as well as a rich collection of case studies and perspective pieces It will be a valuable resource for researchers managers and policy makers interested in the question of how humanity manages and restores ecosystems in a rapidly changing world A companion website with additional resources is available at www.wiley.com/go/hobbs_ecosystems
