Representations of Technoculture in Don DeLillo's Novels Laila Sougri, 2023-09-04 This book is the first to explore technoculture in all of Don DeLillo's novels From *Americana* 1971 to *The Silence* 2020 the American author anatomizes the constantly changing relationship between culture and technology in overt and layered aspects of the characters' experiences Through a tendency to discover and rediscover technocultural modes of appearance DeLillo emphasizes settings wherein technological progress is implicated in cultural imperatives This study brings forth representations of such implication interaction through various themes particularly perception history reality space architecture information and the posthuman The chapters are based on a thematic structure that weaves DeLillo's novels with the rich literary criticism produced on the author and with the various theoretical frameworks of technoculture This leads to the formulation and elaboration on numerous objects of research extracted from DeLillo's novels namely the theorization of DeLillo's radiance in dailiness the investigation of various uses of technology as an extension the role of image technologies in redefining history the reconceptualization of the ethical and behavioral aspects of reality the development of televisual and embodied perceptions in various technocultural spaces and the involvement of information technologies in reconstructing the beliefs behaviors and activities of the posthuman One of the main aims of the study is to show how DeLillo's novels bring to light the constant transformation of technocultural everydayness It is argued that though such transformation is confusing or resisted at times it points to a transitional mode of being This transitional state does not dehumanize DeLillo's characters it reveals their humanity in a continually changing world

L. How Real Is Race? Carol C. Mukhopadhyay, Rosemary Henze, Yolanda T. Moses, 2013-12-11 How real is race What is biological fact what is fiction and where does culture enter What do we mean by a colorblind or postracial society or when we say that race is a social construction If race is an invention can we eliminate it This book now in its second edition employs an activity oriented approach to address these questions and engage readers in unraveling and rethinking the contradictory messages we so often hear about race The authors systematically cover the myth of race as biology and the reality of race as a cultural invention drawing on biocultural and cross cultural perspectives They then extend the discussion to hot button issues that arise in tandem with the concept of race such as educational inequalities slurs and racialized labels and

interracial relationships In so doing they shed light on the intricate dynamic interplay among race culture and biology For an online supplement to How Real Is Race Second Edition [click here](#)
