Estudi tipològic, ecològic i funcional de les pastures de la plana de Vic Casas i Arcarons, M. Carme, 2008-08-21. En aquesta obra es fa un estudi aprofundit de les característiques i l'ecologia de les pastures naturals i seminaturals que formen el mosaic de vegetació dels turons característics de la plana de Vic. A la primera part del llibre es fa la descripció i tipificació de tot el conjunt de prats i pastures naturals i seminaturals que hi ha en els turons de la plana de Vic. La segona part se centra en l'estudi dels factors ecològics i climàtics i edífics que incideixen en la composició i distribució dels diferents tipus de pastures. I a la tercera i última part s'aprofundeix en els aspectes funcionals de les pastures amb l'avaluació i el seguiment de la productivitat de les comunitats praderenques més comunes i més esteses en els turons: les joncades, les files i els llistonars.
