Increasing Resilience to Climate Variability and Change Cecilia

Tortajada, 2016-08-18 This book highlights the role that both infrastructure and governance play in the context of resilience and adaptation to climate variability and change Eleven case studies analyze in depth impacts of extreme events in projects basins and regions in the Arid Americas United States and Mexico Australia Brazil China Egypt France Nepal Mexico Pakistan Turkey and South Africa They discuss the importance of infrastructure mainly reservoirs in adaptation strategies how planning and management aspects should improve in response to changing climatic economic social and environmental situations and what the management institutional and financial challenges would be for their implementation Governance aspects policies institutions and decision making and technical and knowledge limitations are a substantial part of the analyses The case studies argue that reservoirs are essential to build resilience contributing to adaptation to climate variability and change However that for them to be effective they need to be planned and managed within a governance framework that considers long term perspectives and multi sector and multi level actor needs and perspectives *Rural and Regional Futures* Anthony Hogan, Michelle Young, 2014-09-19 Agriculture mining and related rural industries have been central to the development of Australia's economy This book details the role that the Australian Government has played in the making of rural and regional Australia particularly since World War II The book reviews these policies and evaluates them with regards the commitments undertaken by the Government to contribute towards vibrant rural communities Policy areas addressed include agriculture water education welfare and population natural resource management resource extraction Indigenous and affairs localism rural research and regional innovation Youth Affairs and the devolution of regional governance Overall two distinct policy strategies can be observed one wherein the government saw its role as part of the entrepreneurial state and a sector wherein government has increasingly taken itself out of industry development leaving this role to the market Having considered these strategies and their impacts the book concludes that policy over the past 40 years has not in fact contributed to a more vibrant prosperous rural and regional Australia *Rural and Regional Futures* concludes with several chapters looking to the future One chapter explores what the role of the state can be within a social market economy while the final chapter gives consideration to the initial steps rural communities will need to take to begin the process of revitalisation While these materials present as a case study of developments in Australia the policy shift from the Government as entrepreneur to a focus on markets is an international one and as such the insights offered by this book will have wide appeal **The Social Life of Water** John R. Wagner, 2013-08-01 Everywhere in the world communities and nations organize themselves in relation to water We divert water from rivers lakes and aquifers to our homes workplaces irrigation canals and hydro generating stations We use it for bathing swimming recreation and it functions as a symbol of purity in ritual performances In order to facilitate and manage our relationship with water we develop institutions technologies and cultural practices entirely devoted to its appropriation and distribution and through these institutions we

construct relations of class gender ethnicity and nationality Relying on first hand ethnographic research the contributors to this volume examine the social life of water in diverse settings and explore the impacts of commodification urbanization and technology on the availability and quality of water supplies Each case study speaks to a local set of issues but the overall perspective is global with representation from all continents
