unusual in presenting work on CDA which draws on corpus linguistics But not only that it is also unique in presenting work in CDA which brings together the methodologies of corpus linguistics and functional grammar demonstrating their combined potential for illuminating ideological perspectives particularly in media texts Given this focus and given the increasing value of empirical data the book will be of interest to those in a range of disciplines including the humanities and media and cultural studies Chapters comprise both newly commissioned and previously published works that illustrate the two methodological approaches to grammatical analysis and how they can be applied to deepen our understanding of language
