Strategy Benjamin Gomes-Casseres, 2015 Alliances partnerships acquisitions mergers and joint ventures are no longer exceptions in most businesses they are part of the core strategy As companies look to external partners for acquiring even strategic resources and capabilities they need a practical road map for ensuring these relationships generate value What combinations of resources do we need How do we manage them over time What profits will we earn Will they justify our investments Benjamin Gomes Casseres shares insight from decades of consulting and academic research on how companies create new value by remixing resources with other companies Organized around three laws *Remix Strategy* explains how companies can gain the most from their business combinations First Law The value created by the combination should exceed the total that would be generated by the players acting alone How much more value can we create together in the market together What lies behind this joint value Second Law The combination must be designed and managed to realize the joint value in reality What partners and structures fit this goal best How do we manage those elements that are the sources of the joint value Third Law Each participant must earn sufficient profits to reward its investment How do we divide the joint value How might these shares change over time Other books explain how to structure deals or how to navigate complexities of organization and culture This book provides core principles and a practical framework for creating and capturing value no matter the path chosen **Corporate Opportunities** Marco Claudio Corradi, 2021-08-26 This monograph provides a

comprehensive analysis of corporate opportunities doctrines from a comparative perspective It looks at both common law and civil law rules and relies to a large extent on a law and economics approach This book broadens the conventional view on

corporate opportunities a vital step in light of the adoption of corporate opportunities rules in civil law jurisdictions and in light of investors ever changing strategies This approach considers institutional complementarities and especially industrial complementarities The book thus explores several jurisdictions and their economic and industrial environments whilst also assessing the impact of globalisation onto legal reform Furthermore it analyses the problems related to the application of corporate opportunities rules to cross border venture capital In normative terms the book advances one main stance articulated in three points first it proposes different sanctions for undisclosed and disclosed misappropriations supporting the core idea that sanctions should be set against disclosure and not authorisation Secondly it advances the idea that sanctions against undisclosed misappropriations should be more severe than the ones presently applied Thirdly it considers the possibility of a more flexible treatment of disclosed misappropriations This study is positioned at the intersection of several fields providing a lens into a much broader range of dynamics that will be of interest to a varied international readership and offering a window into the broader institutional dynamics at work in centres of innovation eg Silicon Valley and industrial districts in other jurisdictions It is rooted in law and economics but the emphasis is placed on how corporate opportunities rules fit within a broader set of institutional dynamics that affect innovation industrial efficiency and economic competitiveness
