The Mystery of Emotions R D

Hinshelwood,2023-03-16 Psychoanalysis is above all the science of the emotions but as yet there is no single accepted theory of affects Instead there are many all of them too limited based as they are on idiosyncratic introspection R D Hinshelwood presents an extensive scoping of the prominent theories from the philosophy of mind and academic psychology alongside a review of psychoanalytic ideas based on instinct theory or object relations This wide review of divergent theories from various disciplines helps to mitigate variation and identify commonalities From this scoping exercise Hinshelwood creates a

form of qualitative meta analysis which enables the most common dimensions to come to the fore namely 113 features of affects form a more general theory with four dimensions This more systematic view offers an affective space as a model for thinking about the nature of affects their origins and their consequences At the same time Hinshelwood retains the personal He starts with the memory which initiated his quest to understand how much we are rooted in the experience of our feelings and includes a chapter documenting his own idiosyncrasies to bring his own bias to the fore In this way the book preserves the especially personal and intimate quality of its universal topic
