Beyond Narrative Coherence Studies In Narrative:

Beyond Narrative Coherence Matti Hyvärinen, Lars-Christer Hydén, Marja Saarenheimo, Maria Tamboukou, 2010-01-13
Beyond Narrative Coherence reconsiders the way we understand and work with narratives. Even though narrators tend to strive for coherence, they also add complexity, challenge canonical scripts, and survey lives by telling highly perplexing and contradictory stories. Many narratives remain incomplete, ambiguous, and contradictory. Obvious coherence cannot be the sole moral standard, the only perspective of reading, or the criterion for selecting and discarding research material. Beyond Narrative Coherence addresses the limits and aspects of narrative dis-cohering by offering a rich theoretical and historical background to the debate. Limits of narrative coherence are discussed from the perspective of three fields of life that often threaten the coherence of narrative: illness, arts, and traumatic political experience. The authors of the book cover a wide range of disciplines such as psychology, sociology, arts studies, political science, and philosophy.

Beyond Observations Susanne Garvis, Elin Eriksen Ødegaard, Narelle Lemon, 2015-01-01
This book provides important insights into narratives and young children. It is structured to help others learn more about the importance of narrative approaches and early childhood education. The first section of the book explores the concept of narrative across the current research field. The second section explores a range of different narrative methods related to young children. Readers will discover how narrative methods empower children to be heard and respected by adults. They will also discover the importance of narrative methods in allowing a sharing of understanding, knowledge, and trust in contemporary times. Overall, the book aims to encourage readers to critically reflect on new ways of thinking about contemporary research and young children.

Beyond Loss Lars-Christer Hydén, Hilde Lindemann, Jens Brockmeier, 2014
Coming to terms with dementia is one of the great challenges of our time. This volume of new interdisciplinary essays by internationally established scholars offers new ways of understanding

and dealing with it It explores views of dementia that go beyond the idea of loss and rather envisions it as multilayered transformation and change of personhood and identity and as development that mostly is socially shared with others The studies collected here identify new empirical theoretical and methodological areas that will be crucial to future research and clinical practice concerned with age related dementia Three general themes are singled out as of particular importance and interest persons and personhood identity and agency and the social and the communal **Critical Pedagogy for a**

Polymodal World Douglas J. Loveless, Bryant Griffith, 2014-11-04 This book explores the complexity of communication and understanding as a possible asset in formal education rather than a problem that needs to be fixed The authors examine the question and experience as pedagogical tools challenging readers to play the critic and ask hard questions beginning with Why do the ideas discussed within the book matter The digital information age with expanding ways of thinking being communicating and learning complicates public education So what happens as diverse narratives collide in schools To answer this question the authors of this book delve into conflicting assumptions within the framework of complexity sciences and education in an attempt to explore space beyond positivist anti positivist debates This involves examining the role of cultural and aesthetic narratives and cautionary tales as means of acknowledging possibilities in human experiences in education These possibilities can facilitate praxis as theory research and teaching become reflective practices and as thinking about education broadens to include diverse methods of understanding and presenting complex phenomena

Reconsidering Dementia Narratives Rebecca Bitenc, 2019-07-05 Reconsidering Dementia Narratives explores the role of narrative in developing new ways of understanding interacting with and caring for people with dementia It asks how the stories we tell about dementia in fiction life writing and film both reflect and shape the way we think about this important condition Highlighting the need to attend to embodied and relational aspects of identity in dementia the study further outlines ways in which narratives may contribute to dementia care while disputing the idea that the modes of empathy fostered by narrative necessarily bring about more humane care practices This cross medial analysis represents an interdisciplinary approach to dementia narratives which range across auto biography graphic narrative novel film documentary and collaborative storytelling practices The book aims to clarify the limits and affordances of narrative and narrative studies in relation to an ethically driven medical humanities agenda through the use of case studies Answering the key question of whether dementia narratives align with or run counter to the dominant discourse of dementia as loss of self this innovative book will be of interest to anyone interested in dementia studies ageing studies narrative studies in health care and critical medical humanities **Autobiographical Memory, Narrative Identity, and Mental Health** Shamsul
