Building Your IR Theory Toolbox Eric K. Leonard, 2018-03-12 Concise yet comprehensive Building Your IR Theory Toolbox provides undergraduate students with the theoretical framework for understanding events in world politics It covers all the major IR theories realism liberalism Marxism social constructivism feminism and postmodernism along with various iterations including neorealism neoliberal institutionalism and dependency theory Each chapter offers a discussion of how the theory applies to one or more actual cases in world politics a wrap up section with a key take home message and an annotated list of further readings Chapters also include a Thinking Like feature that allows students to view the world through different theoretical lenses Written in an informal style designed to be engaging to the typical freshman or sophomore undergraduate it is the perfect supplement for introduction to international relations or world politics courses

The Magma of War Edgar Illas, 2024-06-21 War from the conflicts in the Middle East and Russia Ukraine to Mexican narco violence from neocolonial land grabs in the Global South to racial border health and climate crises all over the planet defines the most extreme and contradictory expression of the global world In this fascinating exploration on the history of the thinking of conflict Edgar Illas departs from military and sociological analyses to propose a theoretical exploration of war as the ontological force that produces political orders Magma is used as a geological metaphor to theorize the mixtures of politics and war that organize and disorganize global society Divided into two parts Illas study begins by surveying some of the most important thinkers of war moving from classical antiquity to the twentieth century Each thinker provides a different inflection in the historical evolution of the being of war The second part turns to a theorization of the twenty first century to claim that conflictive relations between capital state power political movements and social life in globalization culminate and at the same time reiterate the paradoxes of war as an ontological event The Magma of War is an energizing contribution to the task of rethinking politics in relation to war and an invaluable resource to all those conscious of the unstable forms of contemporary social and political life

Border Security Peter Chambers, 2017-09-27 What kind of a world is one in which border security is understood as necessary How is this transforming the shores of politics And why does this seem to preclude a horizon of political justice for those affected *Border Security* responds to these questions through an interdisciplinary exploration of border security politics and justice Drawing empirically on the now notorious case of Australia the book pursues a range of theoretical perspectives including Foucault s work on power the systems theory of Niklas Luhmann and the cybernetic ethics of Heinz Von Foerster in order to formulate an account of the thoroughly constructed and political nature of border security Through this detailed and critical engagement the book s analysis elicits a political alternative to border security from within its own logic thus signaling at least the beginnings of a way out of the cost cruelty and devaluation of life that characterises the enforced reality of the world of border security

Security, Emancipation and the Politics of Health Joao Nunes, 2013-10-01 This book develops a new theoretical framework for the study of security issues and applies this to the case of health Building on the work of the Welsh School of Security Studies and drawing on contributions from the wider critical security literature the book provides an emancipatory perspective on the health security nexus one which simultaneously teases out its underlying political assumptions assesses its political effects and identifies potential for transformation *Security Emancipation and the Politics of Health* challenges conventional wisdom in the field of health and international politics by conceiving of health as a fundamentally political issue and not merely as a medical problem demanding technical solutions and arrangements The book shows how political processes of representation underpin notions of health and disease through an examination of three key areas the linkages between immigration and the fear of disease colonial medicine and the health as a bridge for peace literature In order to successfully carry out this political investigation of health the book develops an innovative theoretical framework inspired by the idea of security as emancipation which goes beyond the existing

emancipatory literature in security studies This book will be of much interest to students of critical security studies health politics sociology and IR in general **Australia's 'war on terror' Discourse** Kathleen Gleeson,2016-04-08 Too often existing literature has conflated the discourses that enabled the War on Terror ignoring the contextual specificities of the states that make up the Coalition of the Willing Australia's war on terror Discourse fills this gap by providing a full and sustained critical analysis of Australian foreign policy discourse along with the theoretical synthesis for a specific model of critical discourse analysis of the subject The language of then Prime Minister Howard is the primary focus of the book but attention is also paid to the language of key ministers political opponents and other prominent actors The voices of those who challenged the dominant discourse are also considered to shed light on the ways in which discourses can be destabilised Kathleen Gleeson shows how Howard successfully invoked narratives of identity and sovereignty that resonated with his audience and promoted his reworked narrative of Australia whilst facing dissent from many actors who voiced their opposition most successfully when they capitalised on inconsistencies within the discourse **Theorizing Global Order** Gunther Hellmann,2018-01-11 Despite its prominent place in contemporary political discourse and international relations the idea of the global order remains surprisingly sketchy Though it's easy to identify the nations and actors who comprise the major players but pinning down concrete definitions can be more difficult This book not only clarifies a number of related key terms including the use of international versus global and system versus order but also offers a variety of perspectives for theorizing global order *Critical Terrorism Studies* Richard Jackson,Marie Breen Smyth,Jeroen Gunning,2009-02-05 In direct response to the growth of a critical perspective on contemporary issues of terrorism this edited volume brings together a number of leading scholars to debate the need for and the shape of the exciting new subfield of critical terrorism studies

The International in Security, Security in the International Pinar Bilgin,2016-07-15 International Relations continues to come under fire for its relative absence of international perspectives In this exciting new volume Pinar Bilgin encourages readers to consider both why and how non core geocultural sites allow us to think differently about key aspects of global politics Seeking to further debates surrounding thinking beyond the West non West divide this book analyzes how scholarship on and conceptions of the international outside core contexts are tied up with peripheral actors search for security Accordingly Bilgin looks at core periphery dynamics not only in terms of the production of knowledge in the production of IR scholarship or material threats but also peripheral actors conceptions of the international in terms of standard of civilization and their more contemporary guises which she terms as hierarchy in anarchical society The first three chapters provide a critical overview of the limits of our theorizing about IR and security as well as a discussion on the track record of critical approaches to IR and security in addressing those limits The following three chapters offer one way of addressing the limits of our theorizing about IR and security by inquiring into the international in security security in the international Each of these chapters makes a theoretical point and illustrates this further in a spotlight section that further

illustrates the point to aid student learning A genuinely innovative contribution to this rapidly emerging field within IR this book is essential reading for students and scholars of critical security international relations theory and Global IR
