Davies, 2016-02-17 Change programmes in both private and public sectors have a poor record of delivering their intended value The reasons given most often for their failure include lack of executive support or buy in from key users loose requirements definition weak programme management and plain wishful thinking They rarely include technical limitations *Value Management* puts forward the view that the true problem lies in failing to understand the causal links between the intended stakeholder outcomes and the actual programme outputs Repeating the pattern of failure can be avoided by asking two questions Before implementation what capabilities must a change programme deliver when and in what order so as to cause intended value against a defined purpose with speed and certainty During and after implementation what minor

adjustments and or major shifts are needed to be certain that the programme remains on purpose and on value and two answers to be given Target time and align change programmes to deliver maximum intended value to stakeholders the baseline business case track and respond to changes during and beyond implementation to ensure that the programme actually delivers or exceeds intended value value realisation The authors show how by asking and answering these questions direction and delivery of any programme can be clarified and greater economic value achieved **Scorecard Best Practices** Raef Lawson, Denis Desroches, Toby Hatch, 2007-10-05 Scorecard Best Practices Design Implementation and Evaluation expertly shows you how to bridge the gap between Scorecard theory and application through hands on experiences and useful case studies It is the one stop resource you will turn to for the latest tools and know how to implement corrective changes Whether you are a CEO CFO CIO vice president or department manager Scorecard Best Practices is the book you will keep at your fingertips to get your company running at maximum performance

explains how to implement a more enlightened and authentic leadership style that aligns people's strengths to the delivery of a compelling future. *Designing the Purposeful Organization* draws on a unique framework that helps leaders manage the eight elements essential for high performance: purpose, vision, engagement, structure, character, results, success, and talent. It moves beyond the boundaries of transactional performance ("pay me X and I'll deliver Y") to a purpose-centred performance that releases talent, creativity, and engagement. It features case studies from Google, Whole Foods Market, the NHS, and the London 2012 Olympics and is ideal for practitioners in organization development, senior HR managers, and business leaders. This book demonstrates how business performance can be inspired beyond boundaries by aligning people to a compelling purpose.
