Terraforming: The Creating of Habitable Worlds Martin Beech, 2009-04-21 The word terraforming conjures up many exotic images and happens even in wild emotions but at its core it encapsulates the idea that worlds can be changed by direct human action The ultimate aim of terraforming is to alter a hostile planetary environment into one

that is Earth like and eventually upon the surface of the new and vibrant world that you or I could walk freely about and explore It is not entirely clear that this high goal of terraforming can ever be achieved however and consequently throughout much of this book the terraforming idea that are discussed will apply to the goal of making just some fraction of a world habitable In other cases the terraforming described might be aimed at making a world habitable not for humans but for some potential food source that of course could be consumed by humans The many icy moons that reside within the Solar System for example may never be ideal locations for human habitation but they present the great potential for conversion into enormous hydroponic food producing centers The idea of transforming alien worlds has long been a literary backdrop for science fiction writers and many a make believe planet has succumbed to the actions of direct manipulation and the indomitable grinding of colossal machines Indeed there is something both liberating and humbling about the notion of transforming another world it is the quintessential eucatastrophy espoused by J R R Tolkien the catastrophe that ultimately brings about a better world When oxygen was first copiously produced by cyanobacterial activity on the Earth some three billion years ago it was an act of extreme chemical pollution and a eucatastrophy The original life nurturing atmosphere was eventually changed forever but an atmosphere that could support advanced life forms came about

The animal wealth of the western wilderness provided by talented savages encouraged French Americans from Illinois, Canada, and Louisiana to found a cosmopolitan center of international commerce that was a model of multicultural harmony. Historian J. Frederick Fausz offers a fresh interpretation of Saint Louis from 1764 to 1804, explaining how Pierre Laclède, the early Chouteaus, Saint Ange de Bellerive, and the Osage Indians established a gateway to an enlightened alternative frontier of peace and prosperity before Lewis and Clark were even born.
