Religions View Religions , 2006-01-01 Because religion is so central to the lives and experience of the vast majority of people throughout the world it figures very prominently in a variety of ways in interhuman relations Unfortunately religion often appears to be one of the potent sources of mistrust discord and strife between and among individuals groups and cultures What frequently lies at the root of such suspicion and dissension is general ignorance concerning the religious other a lack of knowledge about his or her beliefs aspirations and views of the good and morally honorable life And even if people have some factual knowledge about other religions they regularly display little understanding of them and their adherents Learning both to know and understand people of other faiths and their religions is absolutely requisite to the realization of paradigms of coherent and intelligent convivance that is living together in sensible peaceable and cooperative harmony An effective agency for fostering such knowledge and understanding is the discipline of theology of religions which examines how religions have and ought to view other religions And it is particularly the practice of comparative theology of religions which bears the most promise in this regard The present symposium consists of precisely this kind of comparative exercise and may be viewed as an important contribution to the development of a new project which endeavors to enlarge the horizon and broaden the focus and reflection of theology of religions as that has been gradually developed during the last few decades a new enterprise in other words which seeks to universalize and mutualize theology of religions discourse One of the important things this volume shows is that the views religions have of other religions differ from one another in very substantial ways which is explained by the fact that they derive from diverging paradigms of faith belief and ritual and specific cultural and social contexts This textbook demonstrates how strongly different Hindu Buddhist Shinto and Confucian views are from those of Islam Judaism and Christianity which latter in turn also exhibit considerable differences among themselves These differences are greater than people immersed in their own cultures often realize or expect It is becoming ever more clear that ignorance of or disinclination to acknowledge or refusal to accept these real differences constitute major root causes of serious conflicts in the world The essays in this book written by representatives of the major world religions offer descriptive and or prescriptive appraisals of other religions in general or one other religion in particular from the perspective of the religion of the author concerned It is hoped that this unique exercise in intercultural theology of religions will generate insights and new forms of understanding which can be used by religious leaders and other educators to help correct the disposition toward religious haughtiness insularity and communalism and the dangerous

leanings toward interreligious suspicion antipathy and animosity which are all too often evident in our contemporary societies

Phan, Jonathan Ray, 2014-08-01 Our contemporary world is fast becoming religiously diverse in a variety of ways Thanks to globalization and migration to mention only two current worldwide trends people of diverse and sometimes mutually hostile faiths are now sharing neighborhoods and encountering one another s religious traditions on a daily basis For scholars in religious studies and theology the issue to be examined is whether religious diversity is merely the result of historical development and social interaction or whether it is inherent in the object of belief part of the very structure of faith and our attempts to understand and express it The essays in this volume range from explorations of the impact of religious diversity on religious studies to examples of interfaith encounter and dialogue and current debates on Christian theology of religion These essays examine not only the theoretical issues posed by religious pluralism to the study of religion and Christian theology but also concrete cases in which religious pluralism has been a bone of contention Together they open up new vistas for further conversation on the nature and development of religious pluralism The Core of Oriental Wisdom Edward P. H. Woo, 2008 *Understanding Religious Ritual* John Hoffmann, 2013-03 This book represents contributions from leading scholars from several disciplines that show the diversity of approaches to religious rituals while also providing cross disciplinary perspectives on this topic Understanding Religion Ulrich Riegel, Stefan Heil, Boris Kalbheim, Alexander Unser, 2019-10-14 Today religion is a complex issue In Western Europe the so called Christian heritage is challenged by both other religious traditions and secular worldviews It is therefore essential to understand the complexity of religion in different contexts This volume addresses four questions in this regard How can we assess religion and religiosity appropriately What are important markers of religiosity How does religion affect recent society How can religion be taught in modern society By dealing with these questions the contributions to this volume offer an insight into the recent state of the art of research on religion and religiosity within the field of religious education on an international level
