Chris Niebauer,2024-09-18 HAS SCIENCE CONFIRMED WHAT THE BUDDHA ALREADY KNEW In this groundbreaking book neuropsychology professor Chris Niebauer explains how after decades of research on the brain Western science may have inadvertently confirmed a fundamental tenet of Buddhism anatta or the doctrine of no self Niebauer shows how findings in neuropsychology suggest that our sense of self is actually an illusion created by the left side of the brain and that it exists in the same way a mirage in the middle of the desert exists as a thought rather than a thing This incredible thesis has significant and wide ranging implications in psychology philosophy religion and personal growth Not content to merely detail how this radical new yet ancient perspective could change our view of the world and what it means to be human Niebauer also offers a range of intriguing exercises at the end of each chapter that will allow you to experience this truth for yourself Read this book and you will never view self help the same way again *Happiness and the Psychology of Enlightenment - An Investigation into Methods and Results* Patrick Jones,2025-05-21 Whilst happiness usually comes from how we think and feel about our life event based well being enlightenment is an internal experience not sourced from this process inner well being In this volume we look from a scientific point of view at the different approaches to enlightenment and the practices that trigger it This includes classical Western approaches to contemplation and aesthetics Eastern Buddhist notions of satori modern predictors of self transcendent experiences assessments of current practitioners and their characteristics Christian notions of mysticism Hindu yoga practices the neuroscientific correlates of flourishing and the psychological stages in the journey to enlightenment We explore the evidence of these states traits and experiences the concepts underpinning them and the affect cognition and behaviour they transform **Traditions of Buddhist Practice in Burma** Gustaaf Houtman,1990

Making Sense of Tantric Buddhism Christian K. Wedemeyer, 2014-05-06 Making Sense of Tantric Buddhism fundamentally rethinks the nature of the transgressive theories and practices of the Buddhist Tantric traditions challenging the notion that the Tantras were marginal or primitive and situating them instead both ideologically and institutionally within larger trends in mainstream Buddhist and Indian culture Critically surveying prior scholarship Wedemeyer exposes the fallacies of attributing Tantric transgression to either the passions of lusty monks primitive tribal rites or slavish imitation of Saiva traditions Through comparative analysis of modern historical narratives that depict Tantrism as a degenerate form of Buddhism a primal religious undercurrent or medieval ritualism he likewise demonstrates these to be stock patterns in the European historical imagination Through close analysis of primary sources

Wedemeyer reveals the lived world of Tantric Buddhism as largely continuous with the Indian religious mainstream and deploys contemporary methods of semiotic and structural analysis to make sense of its seemingly repellent and immoral injunctions Innovative semiological readings of the influential Guhyasamaja Tantra underscore the text's overriding concern with purity pollution and transcendent insight issues shared by all Indic religions and a large scale quantitative study of Tantric literature shows its radical antinomianism to be a highly managed ritual observance restricted to a sacerdotal elite These insights into Tantric scripture and ritual clarify the continuities between South Asian Tantrism and broader currents in Indian religion illustrating how thoroughly these radical communities were integrated into the intellectual institutional and social structures of South Asian Buddhism
