participants in the industry about general and globally available construction methods and technologies. Rather than focusing on materials available, construction methods and technologies were described in the book content concerning their classification systems. The subjects and topics are represented in a well-structured hierarchy supported by clear and narrative figures. The book presents general design and application principles of construction methods and technologies without diving into engineering calculations and formulas to keep the content easily understandable by all AEC practitioners and participants. Instead, state-of-the-art construction applications were explained to unveil the logic and application requirements at the background of systems and methods. It also serves as a teaching tool for undergraduate students in architecture, engineering, and construction.
