Applied Spirituality: Seeing Through the Illusion of Our Separateness Robert Colacurcio, 2015-10-14 This volume is a compilation of six smaller books that were published between 2012 and 2014 They were written as though I were taking dictation Some higher power unlocked the gates of inspiration and articulation and I wrote almost continuously for three hours every day without ever first composing an outline for any of these books Instead of coming out as gibberish they form a coherent and I feel cogent whole and so I have grouped them together in one volume Performance excellence in any field requires among other things a clear goal that can be methodically approached incrementally in manageable steps and stages Without a clear goal there can be no cogent methodology Accomplishment in the practice of a spiritual discipline that leads to excellent results is no different Together these books offer a clear goal and method for accomplishing what I feel is the universal target of every valid form of spiritual practice namely seeing through the illusion of our separateness This goal is universal to every form of spiritual aspiration The methods outlined in this book therefore bypass every form of sectarianism They can be applied and practiced by anyone of any faith who is sincerely motivated to deepen in the spirit that unites us all

Innovation in Organizations Michael West,Wieby M. Altink,1996 Two factors have focused the attention of policy makers researchers and senior managers upon the importance of innovation First the increasingly competitive global organizational environment requires that new and improved products processes and procedures are constantly developed Secondly there is widespread recognition that we must use our limited resources in the most efficient and effective way possible This special issue focuses on innovation in organizations in recognition of the primary strategic value of innovation in a rapidly changing European and global market place Psychological perspectives on innovation are particularly important since innovation ultimately is about human behaviour In this book contributors discuss the factors which contribute to individual innovation at work people introducing new and improved role objectives work processes and strategies They also examine factors influencing team level innovation an important area of research in the drive to understand how employees can become involved committed and empowered within organizations The contributors examine factors associated with organizational innovation an area where there is still much prescription but little empirical evidence Finally there is an examination of the

socio cultural factors affecting innovation All the contributors adopt a psychological perspective arguing that it is psychological factors which influence people to develop and introduce new and improved products processes and procedures in their workplaces The contributors who are drawn from a number of European countries exemplify the axiom that heterogeneity is associated with innovation The contents of this book themselves reflect innovative orientations to understanding innovation in organizations Of particular significance is that this book includes contributions from both researchers and practitioners and reveals both the overlaps in their conceptions of innovation at work as well as the areas of disagreement and discrepancy
