World Organization of Systems and Cybernetics 18. Congress-WOSC2021 Igor Perko, Raul Espejo, Vladimir Lepskiy, Dmitry A. Novikov, 2022-08-30 Important world institutions such as the United Nations UN the World Health Organization WHO the International Energy Agency IEA and the Organization for Economic Co-operation and Development OECD have publicly recognized the highly interconnected nature of our world and therefore the relevance of systemic thinking and cybernetics as leading knowledge foundations to deal with the complexity of economic social and environmental issues This recognition was the driving force of the Internet discussions held by participants to the World Organisation of Systems and Cybernetics 18th Congress which last September 27 to 29 WOSC 2021 More than ever we needed to debate and develop current ontological epistemological and methodological approaches to the understanding of the future of humanity WOSC organized this event in collaboration with the Russian Academy of Sciences RAS Scientists of this Academy together with scientists from all over the world made contributions to improving communications beyond particular nation states and regions toward the clarification of global issues like governance health education technology art and others Our aim in

WOSC 2021 was bringing together scientists and researchers to collaborative debates at all levels from local communities to global societies At the end of the Congress scientists were invited to submit contributions to this Springer Nature book along the following four themes firstly philosophical and methodological foundations for the development of the systems approach and cybernetics secondly the cybernetics of society ecology and governance thirdly digital technologies and physical realities merging into a hybrid reality and fourthly the transdisciplinarity of systems sciences and cybernetics applied to the further development of knowledge areas such as education embodiment of social policies and the arts About 25 contributions were accepted for publication in this book We see this as one of WOSC s important contribution to the scientific community around the world

Human Success Hugh Desmond, Grant Ramsey, 2023 What does it mean for our species or for any species to be successful Human Success Evolutionary Origins and Ethical Implications examines the concept of human success from a variety of disciplinary perspectives with contributions from leading paleobiologists anthropologists geologists philosophers of science and ethicists It tells the tale of how the human species grew in success linked metrics such as population size and geographical range and how it came to dominate ecological systems across the globe It explores how culture technology and creativity have contributed to human success However there is a darker side of human success as has become apparent in a world affected by climate change and the destruction of biodiversity This leads us to ask whether the human species can really be called successful and what our future success will look like in terms of our bodies minds morals and our place in the universe The essays in this book probe us to reflect on what has led to our apparent evolutionary success and most importantly what this success implies for the future of our species

A theory of the super soldier Jean-François Caron, 2018-05-02 Throughout history states have tried to create the perfect combatant with superhuman physical and cognitive features that are akin to those of comic book superheroes However the current innovations have nothing to do with the ones from the past and their development goes beyond a simple technological perspective On the contrary they are raising the prospect of a human enhancement revolution that will change the ways with which future wars will be fought and may even profoundly alter the foundations upon which our modern societies are built on This book which discusses the full ethical implications of these new technologies is a unique contribution for students and scholars who care about the morality of warfare

The New Human in Literature Mads Rosendahl Thomsen, 2013-09-26 Twentieth century literature changed understandings of what it meant to be human Mads Rosendahl Thomsen in this historical overview presents a record of literature's changing ideas of mankind questioning the degree to which literature records and creates visions of the new human Grounded in the theory of Niklas Luhmann and drawing on canonical works Thomsen uses literary changes in the mind body and society to define the new human He begins with the modernist minds of Virginia Woolf Williams Carlos Williams and Louis Ferdinand Celine's discusses the society changing concepts envisioned by Chinua Achebe Mo Yan and Orhan Pamuk He concludes with science fiction discussing Don DeLillo and Michel Houellebecq's ideas of revolutionizing man through biotechnology This is a study about imagination aesthetics and ethics that demonstrates literature's capacity to not only imagine the future but portray the conflicting desires between individual and various collectives better than any other media A study that heightens reflections on human evolution and posthumanism

The Bioethics of Enhancement Melinda Hall, 2016-12-07 In a critical intervention into the bioethics debate over human enhancement philosopher Melinda Hall tackles the claim that the expansion and development of human capacities is a moral obligation Hall draws on French philosopher Michel Foucault to reveal and challenge the ways disability is central to the conversation *The Bioethics of Enhancement* includes a close reading and analysis of the last century of enhancement thinking and contemporary transhumanist thinkers the strongest promoters of the obligation to pursue enhancement technology With specific attention to the work of bioethicists Nick Bostrom and Julian Savulescu the book challenges the rhetoric and strategies of enhancement thinking These include the desire to transcend the body and decide who should live in future generations through emerging technologies such as genetic selection Hall provides new analyses rethinking both the philosophy of enhancement and disability arguing that enhancement should be a matter of social and political interventions not genetic and biological interventions Hall concludes that human vulnerability and difference should be cherished rather than extinguished This book will be of interest to academics working in bioethics and disability studies along with those working in Continental philosophy especially on Foucault
