Between Speaking And Silence A Study Of Quiet Students:

Between Speaking and Silence Mary M. Reda, 2009-01-28 Why are students silent Using written reflections and interviews Mary M Reda examines students perceptions of speaking and being silent in a first year composition classroom and explores how their teachers classroom relationships and their own sense of identity shape their decisions to speak or be silent By challenging many firmly held beliefs about those quiet students in the back of the classroom *Between Speaking and Silence* offers the new vision that silence is not necessarily problematic *Journal of International Students 2012 Vol 2 Issue 1* Krishna Bista, 2015-10-03 An interdisciplinary peer reviewed publication Journal of International Students Print ISSN 2162 3104 Online ISSN 2166 3750 is a professional journal that publishes narrative theoretical and empirically based research articles student reflections and book reviews relevant to international students and their cross cultural experiences and understanding Published quarterly the Journal encourages the submission of manuscripts from around the world and from a wide range of academic fields including comparative education international education student affairs linguistics psychology religion sociology business social work philosophy and culture studies For further information <http://jistudents.org>

materiality mediate feminist activism and discusses the implications of these dynamics for pedagogy. Specifically, the text establishes a theoretical foundation for what the author terms psychosocial composing or the metaphorical composing and revising of individual participants and society and the contribution of written and visual texts as an input and output of the relationships between individuals and social culture. This idea is examined through primary research on the Clothesline Project, an international event that invites people who have experienced gender violence directly or indirectly to decorate tee shirts that get hung on clotheslines in public places. Through looking at values and roles of silence in global cultures and the use of material arts in activist efforts, the author argues for the unique value of silence and materiality in individual and collective spaces. The manuscript includes discussion questions and sample teaching materials. Overall, making connections among composition and rhetoric, psychology, sociology, politics, women's studies, art and design, pedagogy, and history, this book further demonstrates the potential interdisciplinary approaches to rhetoric and communication.

Silence and Listening as Rhetorical Arts Cheryl Glenn, Krista Ratcliffe, 2011-01-05. In *Silence and Listening as Rhetorical Arts*, editors Cheryl Glenn and Krista Ratcliffe bring together seventeen essays by new and established scholars that demonstrate the value and importance of silence and listening to the study and practice of rhetoric. Building on the editors' groundbreaking research, which respects the power of the spoken word while challenging the marginalized status of silence and listening, this volume makes a strong case for placing these overlooked concepts and their intersections at the forefront of rhetorical arts within rhetoric and composition studies. Divided into three parts: History, Theory, and Criticism, and Praxes, this book reimagines traditional histories and theories of rhetoric and incorporates contemporary interests such as race, gender, and cross-cultural concerns into scholarly conversations about rhetorical history, theory, criticism, and praxes. For the editors and the other contributors to this volume, silence is not simply the absence of sound, and listening is not a passive act. When used strategically and with purpose, together and separately, silence and listening are powerful rhetorical devices integral to effective communication. The essays cover a wide range of subjects, including women rhetors from ancient Greece and medieval and Renaissance Europe, African philosophy and African American rhetoric, contemporary antiwar protests in the United States, activist conflict resolution in Israel and Palestine, and feminist and second language pedagogies. Taken together, the essays in this volume advance the argument that silence and listening are as important to rhetoric and composition studies as the more traditionally emphasized arts of reading, writing, and speaking, and are particularly effective for theorizing, historicizing, analyzing, and teaching. An extremely valuable resource for instructors and students in rhetoric, composition, and communication studies, *Silence and Listening as Rhetorical Arts* will also have applications beyond academia, helping individuals, cultural groups, and nations more productively discern and implement appropriate actions when all parties agree to engage in rhetorical situations that include not only respectful speaking, reading, and writing, but also productive silence and rhetorical listening.

Silence in the Second Language Classroom J. King, 2013-10-31. Why are second language learners
