Buddhism And Taoism Face To Face Buddhism And Taoism Face To Face:

Buddhism and Taoism Face to Face Christine Mollier, 2008-01-07 Christine Mollier reveals in this volume previously unexplored dimensions of the interaction between Buddhism and Taoism in medieval China. While scholars of Chinese religions have long recognized the mutual influences linking the two traditions, Mollier here brings to light their intense contest for hegemony in the domains of scripture and ritual. Drawing on a far-reaching investigation of canonical texts together with manuscript sources from Dunhuang and the monastic libraries of Japan, many of them studied here for the first time, she demonstrates the competition and complementarity of the two great Chinese religions in their quest to address personal and collective fears of diverse ills including sorcery, famine, and untimely death. In this context, Buddhist apocrypha and Taoist scriptures were composed through a process of mutual borrowing, yielding parallel texts. Mollier argues that closely mirrored one another, life-extending techniques, astrological observances, talismans, spells, and the use of effigies and icons to resolve the fundamental preoccupations of medieval society were similarly incorporated in both religions. In many cases, as a result, one and the same body of material can be found in both Buddhist and Taoist guises. Among the exorcistic, prophylactic, and therapeutic ritual methods explored here in detail are the Heavenly Kitchens that grant divine nutrition to their adepts, incantations that were promoted to counteract bewitchment, as well as talismans for attaining longevity and the protection of stellar deities. The destiny of the Jiuku Tianzun, the Taoist bodhisattva whose salvific mission and iconography were modeled on Guanyin, Avalokitesvara, is examined at length. Through the case studies set forth here, the patterns whereby medieval Buddhists and Taoists each appropriated and transformed for their own use the rites and scriptures of their rivals are revealed with unprecedented precision. *Buddhism and Taoism Face to Face* is abundantly illustrated with drawings and diagrams from canonical and manuscript sources together with art and artifacts photographed by the author in the course of her field research in China. Sophisticated in its analysis, broad in its synthesis of a variety of difficult material, and original in its interpretations, it will be required reading for those interested in East Asian religions and in the history of the medieval Chinese sciences including astrology, medicine, and divination.

Translating Buddhist Medicine in Medieval China C. Pierce Salguero, 2014-07 The transmission of Buddhism from India to China was one of the most significant cross-cultural exchanges in the premodern world. This cultural encounter involved more than the spread of religious and philosophical knowledge. It influenced many spheres of Chinese life, including the often overlooked field of medicine. Analyzing a wide variety of Chinese Buddhist texts, C. Pierce Salguero examines the reception of Indian medical ideas in medieval China. These texts include translations from Indian languages as well as Chinese compositions completed in the first millennium C.E. *Translating Buddhist Medicine in Medieval China* illuminates and analyzes the ways Chinese Buddhist writers understood and adapted Indian medical knowledge and healing practices and explained them to local audiences. The book moves beyond considerations of accuracy in translation by exploring the resonances and social logics of intercultural communication in

their historical context Presenting the Chinese reception of Indian medicine as a process of negotiation and adaptation this innovative and interdisciplinary work provides a dynamic exploration of the medical world of medieval Chinese society At the center of Salguero s work is an appreciation of the creativity of individual writers as they made sense of disease health and the body in the context of regional and transnational traditions By integrating religious studies translation studies and literature with the history of medicine *Translating Buddhist Medicine in Medieval China* reconstructs the crucial role of translated Buddhist knowledge in the vibrant medical world of medieval China **Dunhuang Manuscript Culture** Imre Galambos,2020-12-07 *Dunhuang Manuscript Culture* explores the world of Chinese manuscripts from ninth tenth century Dunhuang an oasis city along the network of pre modern routes known today collectively as the Silk Roads The manuscripts have been discovered in 1900 in a sealed off side chamber of a Buddhist cave temple where they had lain undisturbed for for almost nine hundred years The discovery comprised tens of thousands of texts written in over twenty different languages and scripts including Chinese Tibetan Old Uighur Khotanese Sogdian and Sanskrit This study centres around four groups of manuscripts from the mid ninth to the late tenth centuries a period when the region was an independent kingdom ruled by local families The central argument is that the manuscripts attest to the unique cultural diversity of the region during this period exhibiting alongside obvious Chinese elements the heavy influence of Central Asian cultures As a result it was much less Chinese than commonly portrayed in modern scholarship The book makes a contribution to the study of cultural and linguistic interaction along the Silk Roads Power of Place James Robson,2020-03-17 Throughout Chinese history mountains have been integral components of the religious landscape They have been considered divine or numinous sites the abodes of deities the preferred locations for temples and monasteries and destinations for pilgrims Early in Chinese history a set of five mountains were co opted into the imperial cult and declared sacred peaks yue demarcating and protecting the boundaries of the Chinese imperium The Southern Sacred Peak or Nanyue is of interest to scholars not the least because the title has been awarded to several different mountains over the years The dynamic nature of Nanyue raises a significant theoretical issue of the mobility of sacred space and the nature of the struggles involved in such moves Another facet of Nanyue is the multiple meanings assigned to this place political religious and cultural Of particular interest is the negotiation of this space by Daoists and Buddhists The history of their interaction leads to questions about the nature of the divisions between these two religious traditions James Robson s analysis of these topics demonstrates the value of local studies and the emerging field of Buddhio Daoist studies in research on Chinese religion *A Stairway to Heaven: Daoist Self-Cultivation in Early Modern China* Paul van Enckevort,2024-11-04 By the eleventh century communities of religious practitioners in China had developed a theory and practice of meditative self cultivation that combined the so called Three Teachings By the seventeenth century Wu Shouyang created a synthesis of the various lineages of this inner alchemy combining it with elements from Buddhism and Confucianism By the late nineteenth century his writings had become bestsellers in the genre

and his became the standard account of this tradition This first book length English language study of Wu Shouyang s life and works introduces his remarkable life and formulates answers to fundamental questions about this important tradition

Language and Religion Robert Yelle,Courtney Handman,Christopher Lehrich,2019-02-19 This volume draws on an interdisciplinary team of authors to advance the study of the religious dimensions of communication and the linguistic aspects of religion Contributions cover poetry iconicity and iconoclasm in religious language semiotic ideologies in traditional religions and in secularism and the role of materiality and writing in religious communication This volume will provoke new approaches to language and religion

Buddhist Healing in Medieval China and Japan C. Pierce Salguero,Andrew Macomber,2020-08-31 From its inception in northeastern India in the first millennium BCE the Buddhist tradition has advocated a range of ideas and practices that were said to ensure health and well being As the religion developed and spread to other parts of Asia healing deities were added to its pantheon monastic institutions became centers of medical learning and healer monks gained renown for their mastery of ritual and medicinal therapeutics In China imported Buddhist knowledge contended with a sophisticated state supported system of medicine that was able to retain its influence among the elite Further afield in Japan where Chinese Buddhism and Chinese medicine were introduced simultaneously as part of the country s adoption of civilization from the Middle Kingdom the two were reconciled by individuals who deemed them compatible In East Asia Buddhist healing would remain a site of intercultural tension and negotiation While participating in transregional networks of circulation and exchange Buddhist clerics practiced locally specific blends of Indian and indigenous therapies and occupied locally defined social positions as religious and medical specialists In this diverse and compelling collection an international group of scholars analyzes the historical connections between Buddhism and healing in medieval China and Japan Contributors focus on the transnationally conveyed aspects of Buddhist healing traditions as they moved across geographic cultural and linguistic boundaries Simultaneously the chapters also investigate the local instantiations of these ideas and practices as they were reinvented altered and re embedded in specific social and institutional contexts Investigating the interplay between the macro and micro the global and the local this book demonstrates the richness of Buddhist healing as a way to explore the history of cross cultural exchange
