Christendom Patricia G. Kirkpatrick, Pamela R. McCarroll, 2020-11-24 Christian Theology after Christendom Engaging the Thought of Douglas John Hall brings together contemporary thinkers to engage and build upon Douglas John Hall's work and to take up his challenge to reclaim a contextual and decolonizing theology of the cross as a means to speak to the realities of life and faith today With a focus on contemporary issues this edited collection critically analyzes and deconstructs the centuries old colonial triumphalism of Christian theology and the church in the West This book seeks to frame present day crises in ways that honor a deeply rooted theologia crucis that does not colonize the other It explores constructive decolonizing possibilities for Christian theology at the end of Christendom Organizing Spirit Jamie Pitts, 2025-06-12 Contemporary theologians tend to associate the Holy Spirit with the formation of local communities social movements and fluid relational networks and not with institutions such as denominations or global church bodies In this work Jamie Pitts argues that this pneumatological sociological picture misses important aspects of the Spirit's work Pitts draws on a wide

range of theological and theoretical resources to depict the Spirit as organizing the complex dynamic and relationally entangled structures that constitute creation Human organizing that seeks to participate in the Spirit can take a variety of analogous structural forms including formal organizations or institutions Organizational participation in the Spirit is not a function of an organization's scale mobility or relative informality but rather of its practical orientation toward the Spirit's goals of life solidarity healing and inclusive justice A series of case studies clarifies and extends the implications of the argument in connection to organizing for environmental gender sexual and racial justice In the final chapter Pitts addresses the role of a political theology of the organizing Spirit in imagining organizational alternatives to the global neoliberal order

The Great Spiritual Migration Brian D. McLaren, 2016-09-20 The Christian story from Genesis until now is fundamentally about people on the move outgrowing old broken religious systems and embracing new more redemptive ways of life It's time to move again Brian McLaren a leading voice in contemporary religion argues that notwithstanding the dire headlines about the demise of faith and drop in church attendance Christian faith is not dying Rather it is embarking on a once in an era spiritual shift For millions the journey has already begun Drawing from his work as global activist pastor and public theologian McLaren challenges readers to stop worrying waiting and indulging in nostalgia and instead to embrace the powerful new understandings that are reshaping the church In *The Great Spiritual Migration* he explores three profound shifts that define the change Spiritually growing numbers of Christians are moving away from defining themselves by lists of beliefs and toward a way of life defined by love Theologically believers are increasingly rejecting the image of God as a violent Supreme Being and embracing the image of God as the renewing Spirit at work in our world for the common good Missionally the faithful are identifying less with organized religion and more with organizing religion spiritual activists dedicated to healing the planet building peace overcoming poverty and injustice and collaborating with other faiths to ensure a better future for all of us With his trademark brilliance and compassion McLaren invites readers to seize the moment and set out on the most significant spiritual pilgrimage of our time to help Christianity become more Christian

Religion and Power Jione Havea, 2020-07-07 Religion has power structures that require and justify its existence spread its influence and mask its collaboration with other power structures Power like religion is in collaboration Along this line this book affirms that one could see and study the power structures and power relations of a religion in and through the missions of empires Empires rise and roam with the blessings and protections of religious power structures e g scriptures theologies interpretations traditions that in return carry propagate and justify imperial agendas Thus to understand the relation between religion and power requires one to also study the relation between religion and empires Christianity is the religion that receives the most deliberation in this book with some attention to power structures and power relations in Hinduism and Buddhism The cross cultural and inter national contributors share the conviction that something within each religion resists and subverts its power structures and collaborations The authors discern and interrogate the involvements of religion with empires past and present political and ideological economic and customary systemic and local The upshot is that the book troubles religious teachings and practices that sustain as well as profit from empires

First World Petro-Politics Laurie E. Adkin, 2016-01-01 First World Petro Politics examines the vital yet understudied case of a first world petro state facing related social ecological and economic crises in the context of recent critical work on fossil capitalism A wide ranging and richly documented study of Alberta s political ecology the relationship between the province s political and economic institutions and its natural environment the volume tackles questions about the nature of the political regime how it has governed and where its primary fractures have emerged Its authors examine Alberta s neo liberal environmental regulation institutional adaptation to petro state imperatives social movement organizing Indigenous responses to extractive development media framing of issues and corporate strategies to secure social license to operate Importantly they also discuss policy alternatives for political democratization and for a transition to a low carbon economy The volume s conclusions offer a critical examination of petro state theory arguing for a comparative and contextual approach to understanding the relationships between dependence on carbon extraction and the nature of political regimes
