Bug Music How Insects Gave Us Rhythm And Noise

Jessica J Manson

Bug Music How Insects Gave Us Rhythm And Noise:

Bug Music David Rothenberg, 2013-04-16 Analyzes the role of insects in teaching humans about music tracing research into exotic insect markets and research labs while explaining how insect sound and movement patterns inspired traditions in rhythm synchronization and dance

Bug Music David Rothenberg, 2013-04-16 In the spring of 2013 the cicadas in the Northeastern United States will yet again emerge from their seventeen year cycle the longest gestation period of any animal Those who experience this great sonic invasion compare their sense of wonder to the arrival of a comet or a solar eclipse This unending rhythmic cycle is just one unique example of how the pulse and noise of insects has taught humans the meaning of rhythm from the whirr of a cricket s wings to this unfathomable and exact seventeen year beat In listening to cicadas as well as other humming clicking and thrumming insects Bug Music is the first book to consider the radical notion that we humans got our idea of rhythm synchronization and dance from the world of insect sounds that surrounded our species over the millions of years over which we evolved Completing the trilogy he began with *Why Birds Sing* and *Thousand Mile Song* David Rothenberg explores a unique part of our relationship with nature and sound the music of insects that has provided a soundtrack for humanity throughout the history of our species Bug Music continues Rothenberg s in depth research and spirited writing on the relationship between human and animal music and it follows him as he explores insect influences in classical and modern music plays his saxophone with crickets and other insects and confers with researchers and scientists nationwide This engaging and thought provoking book challenges our understanding of our place in nature and our relationship to the creatures surrounding us and makes a passionate case for the interconnectedness of species

Music in the Social and Behavioral Sciences William Forde Thompson, 2014-07-18 This first definitive reference resource to take a broad interdisciplinary approach to the nexus between music and the social and behavioral sciences examines how music affects human beings and their interactions in and with the world The interdisciplinary nature of the work provides a starting place for students to situate the status of music within the social sciences in fields such as anthropology communications psychology linguistics sociology sports political science and economics as well as biology and the health sciences Features Approximately 450 articles arranged in A to Z fashion and richly illustrated with photographs provide the social and behavioral context for examining the importance of music in society Entries are authored and signed by experts in the field and conclude with references and further readings as well as cross references to related entries A Reader s Guide groups related entries by broad topic areas and themes making it easy for readers to quickly identify related entries A Chronology of Music places material into historical context a Glossary defines key terms from the field and a Resource Guide provides lists of books academic journals websites and cross references The multimedia digital edition is enhanced with video and audio clips and features strong search and browse capabilities through the electronic Reader s Guide detailed index and cross references Music in the Social and Behavioral Sciences available in both multimedia digital and print formats is a must have

reference for music and social science library collections **The Insect Epiphany** Barrett Klein, 2024-10-15 From entomologist Barrett Klein comes a buzz worthy exploration of the many ways insects have affected human society history and culture Insects surround us They fuel life on Earth through their roles as pollinators predators and prey but rarely do we consider the outsize influence they have had on our culture and civilization Their anatomy and habits inform how we live work create art and innovate Featuring nearly 250 color images from ancient etchings to avant garde art from bug based meals to haute couture *The Insect Epiphany* proves that our world would look very different without insects not just because they are crucial to our ecosystems but because they have shaped and inspired so many aspects of what makes us human

Knowing Life Brianne Donaldson, 2025-02-28 *Knowing Life* examines the limits of dominant knowledge forms that contribute to current practices negatively affecting more than human beings while also exploring alternative approaches to knowing that are capable of reducing harm and maximizing planetary thriving Specifically this volume seeks multispecies answers to long standing questions in Western philosophy Who or what counts as a knower What kinds of knowing are valid Is knowledge a product of mind body or something else Historically these epistemic questions have been answered in ways that neutralize the knowing and knowledge contribution of and for more than human beings as well as those on the margins of society considered less than human Consequently these epistemic assumptions often support the destruction of ecological habitats industrialization of food animals widespread use of insect and plant toxins water and air pollution climate extinctions ecological militarism and the perpetual flow of living beings used for entertainment research clothing companionship and economic resources In this book crosscultural and multidisciplinary contributors including lesser known global religious philosophical accounts philosophies of plant and insect life race and disability studies laboratory epistemology embodied semiotics and scholar artists challenge and expand these classical concepts through diverse modes of embodied engagement on multispecies knowing toward open futures of planetary co flourishing **The Butterfly Effect** Edward D.

Melillo, 2020-08-25 A fascinating entertaining dive into the long standing relationship between humans and insects revealing the surprising ways we depend on these tiny six legged creatures Insects might make us shudder in disgust but they are also responsible for many of the things we take for granted in our daily lives When we bite into a shiny apple listen to the resonant notes of a violin get dressed receive a dental implant or get a manicure we are the beneficiaries of a vast army of insects Try as we might to replicate their raw material silk shellac and cochineal for instance our artificial substitutes have proven subpar at best and at worst toxic ensuring our interdependence with the insect world for the foreseeable future Drawing on research in laboratory science agriculture fashion and international cuisine Edward D Melillo weaves a vibrant world history that illustrates the inextricable and fascinating bonds between humans and insects Across time we have not only coexisted with these creatures but have relied on them for among other things the key discoveries of modern medical science and the future of the world s food supply Without insects entire sectors of global industry would grind to a halt and

essential features of modern life would disappear Here is a beguiling appreciation of the ways in which these creatures have altered and continue to shape the very framework of our existence **The Musical Human** Michael Spitzer, 2021-04-01 A RADIO 4 BOOK OF THE WEEK Full of delightful nuggets Guardian online Entertaining informative and philosophical An essential read All About History Extraordinary range All the world and more is here Evening Standard 165 million years ago saw the birth of rhythm 66 million years ago came the first melody 40 thousand years ago Homo sapiens created the first musical instrument Today music fills our lives How we have created performed and listened to music throughout history has defined what our species is and how we understand who we are Yet it is an overlooked part of our origin story The Musical Human takes us on an exhilarating journey across the ages from Bach to BTS and back to explore the vibrant relationship between music and the human species With insights from a wealth of disciplines world leading musicologist Michael Spitzer renders a global history of music on the widest possible canvas from global history to our everyday lives from insects to apes humans to artificial intelligence Michael Spitzer has pulled off the impossible a Guns Germs and Steel for music Daniel Levitin A thrilling exploration of what music has meant and means to humankind Ian Bostridge Why Life Matters Michael Charles Tobias, Jane Gray Morrison, 2014-11-03 Dr Michael Charles Tobias and Jane Gray Morrison are world renowned ecological philosophers and activists interdisciplinary social and environmental scientists and broad ranging deeply committed humanists This collection of fifty essays and interviews comprises an invigorating outspoken provocative and eloquent overview of the ecological humanities in one highly accessible volume The components of this collection were published in the authors Green Conversations blog series and pieces in the Eco News Network from 2011 to 2013 and feature luminaries from Jane Goodall to Ted Turner to the Secretary of the Smithsonian Institution to the former head of the UN Convention on Biological Diversity Stunning color photographs captured by the authors and contributors make Why Life Matters Fifty Ecosystems of the Heart and Mind a feast for the eyes as well as the mind and soul Ethics science technology ecological literacy grass roots renaissance thinkers conservation innovation from the U S to the U K from India to Ecuador from Bhutan to Haiti from across Africa the Neo Tropics Central Asia and Japan to Rio Shanghai and Manhattan this humanistic ode to the future of life on earth is a relevant and resonating read Michael Tobias and Jane Gray Morrison partners who between them have authored some 50 books and written directed and produced some 170 films a prolific body of work that has been read translated and or broadcast around the world have been married for more than a quarter of a century Their field research across the disciplines of comparative literature anthropology the history of science and philosophy ecology and ethics in over 80 countries has served as a telling example of what two people deeply in love with one another can accomplish in spreading that same unconditional love to others of all species **Music in Our Lives** Jonathan L. Friedmann, 2015-01-02 Music research has entered something of a Golden Age Technological advances and scholarly inquiry have merged in interdisciplinary studies drawing on psychology neuroscience evolutionary biology anthropology and

other fields that illuminate the musical nature of our species This volume develops supports and challenges that body of research examining key issues in the field such as the difficulty of writing about music the formation of musical preferences the emotional impact of musical sounds the comparison of music and language the impulse for making music and the connection between music and spirituality

Eat the Beetles! David Waltner-Toews, 2017-05-09 Provides a sturdy literary exoskeleton to the field of human insectivory it entertains as it enlightens Daniella Martin author of *Edible* Meet the beetles there are millions and millions of them and many fewer of the rest of us mammals birds and reptiles Since before recorded history humans have eaten insects While many get squeamish at the idea entomophagy people eating insects is a possible way to ensure a sustainable and secure food supply for the eight billion of us on the planet Once seen as the great enemy of human civilization destroying our crops and spreading plagues we now see insects as marvelous pollinators of our food crops and a potential source of commercial food supply From upscale restaurants where black ants garnish raw salmon to grubs as pub snacks in Paris and Tokyo from backyard cricket farming to high tech businesses *Eat the Beetles* weaves these cultural ecological and evolutionary narratives to provide an accessible and humorous exploration of entomophagy Waltner Toews punctuates this serious subject with his quirky humour *Eat the Beetles* is an essential part of a growing buzz Toronto Star An excellent read for those interested in multiple perspectives on the issue of entomophagy digging deep into science and math with flair and irreverence Scene Magazine When it comes to the future of insects as food for humans and livestock Waltner Toews walks the line between skepticism and optimism in an intelligent witty and provocative analysis Jeff Lockwood author of *The Infested Mind* Full of humor and science this edible insect book is definitely a must read EntoMove Project
