Building Intelligent Information Systems Software Thomas D. Feigenbaum, 2015-12-07 Building Intelligent Information Systems Software shows scientists and engineers how to build applications that model complex information data and knowledge without the need for coding Traditional software development takes time and leads to inflexible complicated applications that almost but don't exactly meet the intended needs Requirements can change sometimes mid development and adapting existing systems can be difficult Individual solutions can be incompatible leading to information silos and inefficiency throughout an organization This book offers a solution the Information Unit Model an innovative architecture for translating domain knowledge into applications By encapsulating the complexities of computing the Unit Model allows engineers to focus on business or experimental needs Author Tom Feigenbaum inventor of the Unit Modeler demonstrates this innovative software architecture for rapid application design and development His approach promotes repurposing pre existing tools and libraries and collaborating across the cloud to promote information sharing and efficient development practices Each concept is illustrated with examples including file management data management and 3D visualization Turn your domain knowledge into applications without heavy coding Design and develop information systems applications in a fraction of the time of traditional methods Leverage previously built components to jump start new projects Includes access to a trial version of the Information Unit Modeler tool for rapid application development

Intelligent Information Processing and Web Mining Mieczyslaw A. Klopotek, Slawomir T. Wierzchon, Krzysztof Trojanowski, 2013-06-05 This volume contains articles accepted for presentation during The Intelligent Information Processing and Web Mining Conference IIS IIPWM 03 which was held in Zakopane Poland on June 2-5 2003 This conference extends a series of 12 successful symposia on Intelligent Information Systems organized by the Institute of Computer Science of Polish Academy of Sciences devoted to

new trends in broadly understood Artificial Intelligence The idea of organizing such meetings dates back to 1992 Our main intention guided the first rather small audience workshop in the series was to resume the results gained in Polish scientific centers as well as contrast them with the research performed by Polish scientists working at the universities in Europe and USA and their foreign collaborators This idea proved to be attractive enough that we decided to continue such meetings As the years went by the workshops has transformed into regular symposia devoted to such fields like Machine Learning Knowledge Discovery Natural Language Processing Knowledge Based Systems and Reasoning and Soft Computing i e Fuzzy and Rough Sets Bayesian Networks Neural Networks and Evolutionary Algorithms At present about 50 papers prepared by researches from Poland and other countries are usually presented This year conference is an attempt to draw a much broader international audience on the one hand and to devote much more attention to the newest developments in the area of Artificial Intelligence Therefore special calls for contributions on artificial immune systems and search engines

Intelligent Information Systems Cristina Cabanillas, Francisca Pérez, 2023-06-07 This book constitutes the thoroughly refereed proceedings of the CAiSE Forum 2023 which was held in Zaragoza Spain in June 2023 as part of the 35th International Conference on Advanced Information Systems Engineering CAiSE 2023 The CAiSE Forum is a place within the CAiSE conference for presenting and discussing new ideas and tools related to information systems engineering Intended to serve as an interactive platform the Forum aims at the presentation of emerging new topics and controversial positions as well as demonstration of innovative systems tools and applications This year's edition of the conference put a special emphasis on the theme of Cyber Human Systems A total of 25 papers was sent for peer review 12 of these papers were invited from CAiSE and 13 have been directly submitted to the Forum After a careful review and selection 12 of the invited and 6 of the newly submitted papers have been accepted for publication

Artificial Intelligence Applications and Innovations Vladan Devedžić, 2006-04-11 Artificial Intelligence and Innovations AIAI will interest researchers IT professionals and consultants by examining technologies and applications of demonstrable value The conference focused on profitable intelligent systems and technologies AIAI focuses on real world applications therefore authors should highlight the benefits of AI technology for industry and services Novel approaches solving business and industrial problems using AI will emerge from this conference

Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements Xueyan Liu, Kumar Anupam, Sandra Erkens, Lijun Sun, Jianming Ling, 2021-12-24 Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements contains 124 papers from 14 different countries which were presented at the 5th International Symposium on Frontiers of Road and Airport Engineering IFRAE 2021 Delft the Netherlands 12-14 July 2021 The contributions focus on research in the areas of Circular Sustainable and Smart Airport and Highway Pavement and collects the state of the art and state of practice areas of long life and circular materials for sustainable cost effective smart airport and highway pavement design and construction The main areas covered by the book include Green and sustainable pavement

materials Recycling technology Warm cold mix asphalt materials Functional pavement design Self healing pavement materials Eco efficiency pavement materials Pavement preservation maintenance and rehabilitation Smart pavement materials and structures Safety technology for smart roads Pavement monitoring and big data analysis Role of transportation engineering in future pavements Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements aims at researchers practitioners and administrators interested in new materials and innovative technologies for achieving sustainable and renewable pavement materials and design methods and for those involved or working in the broader field of pavement engineering , **Hydraulic and Civil Engineering Technology VIII** Mijia Yang,Pijush Samui,João C.G. Lanzinha,Jianhui Hu,2023-12-15 All of us are dependent on a built environment constructed and maintained by civil and hydraulic engineers and for those working in these fields keeping up to date with the latest technological developments is vital for the safe and efficient design and operation of this infrastructure This book presents the proceedings of HCET 2023 the 8th International Technical Conference on Frontiers of Hydraulic and Civil Engineering Technology held from 25 27 September 2023 in Wuhan China HCET is an international conference which aims to enhance the development of hydraulic and civil engineering in China with a focus on high end intelligent and green technologies It seeks to do this by consolidating global wisdom and achievements and providing scientific support HCET also offers an excellent opportunity for scientists researchers and engineers from around the world to exchange their findings and discuss developments establishing a basis for national and international collaboration A total of 316 contributions were received for the 2023 edition of which 187 were ultimately accepted after a rigorous review process and checks for quality and plagiarism Topics covered include the research and development of concrete structure design and analysis structural mechanics and structural engineering building and future materials hydraulic engineering geological exploration and earthquake engineering building technology urban planning road bridge and traffic engineering energy infrastructure environmental engineering and advanced engineering technologies and interdisciplinary sciences and applications Covering a wide range of subjects related to hydraulic engineering and civil engineering technology and associated transdisciplinary sciences the book will be of interest to all those working in the field *The Directory of Graduate Studies* ,1999 Information Systems Architecture and Technology: Proceedings of 39th International Conference on Information Systems Architecture and Technology - ISAT 2018 Jerzy Świątek,Leszek Borzemski,Zofia Wilimowska,2018-08-27 This three volume set of books highlights major advances in the development of concepts and techniques in the area of new technologies and architectures of contemporary information systems Further it helps readers solve specific research and analytical problems and glean useful knowledge and business value from the data Each chapter provides an analysis of a specific technical problem followed by a numerical analysis simulation and implementation of the solution to the real life problem Managing an organisation especially in today s rapidly changing circumstances is a very complex process Increased competition in the marketplace especially as a result of the

massive and successful entry of foreign businesses into domestic markets changes in consumer behaviour and broader access to new technologies and information calls for organisational restructuring and the introduction and modification of management methods using the latest advances in science This situation has prompted many decision making bodies to introduce computer modelling of organisation management systems The three books present the peer reviewed proceedings of the 39th International Conference Information Systems Architecture and Technology ISAT held on September 16 18 2018 in Nysa Poland The conference was organised by the Computer Science and Management Systems Departments Faculty of Computer Science and Management Wroclaw University of Technology and Sciences and University of Applied Sciences in Nysa Poland The papers have been grouped into three major parts Part I discusses topics including but not limited to Artificial Intelligence Methods Knowledge Discovery and Data Mining Big Data Knowledge Based Management Internet of Things Cloud Computing and High Performance Computing Distributed Computer Systems Content Delivery Networks and Service Oriented Computing Part II addresses topics including but not limited to System Modelling for Control Recognition and Decision Support Mathematical Modelling in Computer System Design Service Oriented Systems and Cloud Computing and Complex Process Modelling Part III focuses on topics including but not limited to Knowledge Based Management Modelling of Financial and Investment Decisions Modelling of Managerial Decisions Production Systems Management and Maintenance Risk Management Small Business Management and Theories and Models of Innovation
