

A black and white photograph of a man in a suit, seen from the side, looking down at several architectural models or plans laid out on a dark, reflective table. The models appear to be small-scale representations of buildings. The lighting is dramatic, with strong highlights and deep shadows.

Adrian Forty Words And Buildings:

Words and Buildings Adrian Forty, 2004 Available again a wholly original study of the complex relationship between architecture and language that has changed and enriched the way we think and talk about architecture The words we use when we talk and write about architecture describe more than just bricks and mortar they direct the ways we think of and live with buildings This groundbreaking book is the first thorough examination of the complex relationship between architecture and language as intricate social practices Six rigorously argued chapters investigate the language of modernism language and drawing masculine and feminine architecture language metaphors science in architecture and the social properties of architecture There follows a vocabulary of key words such as Character Form History and Space locating each words modern meaning within an historical and theoretical framework and setting out clearly its development and relevance for architects historians philosophers critics and the users of the buildings themselves Architects should be made to read *Words and Buildings* Architecture Today Unusually clear and accessible Students of all kinds will love this book The Architectural Review A forceful clear and sophisticated exposition of the role of conceptual thought in architectural discourse The Architects Journal *Words and Buildings* Adrian Forty, 2000 *Words and Buildings* Adrian Forty, 2000 **The Words Between the Spaces** Deborah Cameron, Thomas A. Markus, 2003-09-02 Using language speaking and understanding it is a defining ability of human beings woven into all human activity It is therefore inevitable that it should be deeply implicated in the design production and use of buildings Building legislation design guides competition and other briefs architectural criticism teaching and scholarly material and the media all produce their characteristic texts The authors use texts about such projects as Berlin s new Reichstag Scotland s new Parliament and the Auschwitz concentration camp museum to clarify the interaction between texts design critical debate and response *Concrete and Culture* Adrian Forty, 2013-02-15 Concrete has been used in arches vaults and domes dating as far back as the Roman Empire Today it is everywhere in our roads bridges sidewalks walls and architecture For each person on the planet nearly three tons of concrete are produced every year Used almost universally in modern construction concrete has become a polarizing material that provokes intense loathing in some and fervent passion in others Focusing on concrete s effects on culture rather than its technical properties *Concrete and Culture* examines the ways concrete has changed our understanding of nature of time and even of material Adrian Forty concentrates not only on architects responses to concrete but also takes into account the role concrete has played in politics literature cinema labor relations and arguments about sustainability Covering Europe North and South America and the Far East Forty examines the degree that concrete has been responsible for modernist uniformity and the debates engendered by it The first book to reflect on the global consequences of concrete *Concrete and Culture* offers a new way to look at our environment over the past century *Architectures of Chance* Yeoryia Manolopoulou, 2017-03-02 Architectural discourse and practice are dominated by a false dichotomy between design and

chance and governed by the belief that the architect's role is to defend against the indeterminate. In *Architectures of Chance*, Yeoryia Manolopoulou challenges this position, arguing for the need to develop a more creative understanding of chance as aesthetic experience and critical method and as a design practice in its own right. Examining the role of experimental chance across film, psychoanalysis, philosophy, fine art, and performance, this is the first book to comprehensively discuss the idea of chance in architecture and bring a rich array of innovative practices of chance to the attention of architects. Wide-ranging and through a symbiotic interplay of drawing and text, *Architectures of Chance* makes illuminating reading for those interested in the process and experience of design and the poetics and ethics of chance and space in the overlapping fields of architecture and the aleatoric arts. *Poetry, Architecture, and the New York School* Mae Losasso, 2023-12-20

Poetry Architecture and the New York School Something Like a Liveable Space examines the relationship between poetics and architecture in the work of the first generation New York School poets: Frank O'Hara, John Ashbery, Barbara Guest, and James Schuyler. Reappraising the much-debated New York School label, Mae Losasso shows how these writers constructed poetic spaces, structures, surfaces, and apertures and sought to figure themselves and their readers in relation to these architextual sites. In doing so, Losasso reveals how the built environment shapes the poetic imagination and how, in turn, poetry alters the way we read and inhabit architectural space. Animated by archival research and architectural photographs, *Poetry Architecture and the New York School* marks a decisive interdisciplinary turn in New York School studies and offers new frameworks for thinking about postmodern American poetry in the twenty-first century. **The Emergence of the Interior** Charles Rice, 2006-11-22

Taking a radical position counter to many previous histories and theories of the interior, domesticity, and the home, *The Emergence of the Interior* considers how the concept and experience of the domestic interior have been formed from the beginning of the nineteenth century. It considers the interior's emergence in relation to the thinking of Walter Benjamin and Sigmund Freud and through case studies in architecture's trajectories toward modernism. The book argues that the interior emerged with a sense of doubleness, being understood and experienced as both a spatial and an image-based condition. Incorporating perspectives from architecture, critical history, and theory, and psychoanalysis, *The Emergence of the Interior* will be of interest to academics and students of the history and theory of architecture and design, social history, and cultural studies. *Space and Place: Diversity in Reality, Imagination, and Representation* Brooke L. Rogers, Anna Sugiyama, 2019-01-04

This volume was first published by Interdisciplinary Press in 2013. The search for a greater understanding of space and place inevitably involves an encounter with divergent approaches across a range of academic disciplines. Twenty authors from disciplines such as architecture, archaeology, philosophy, social work, politics, and the creative and visual arts have contributed papers to this compilation. *Nineteenth-Century Photographs and Architecture* Micheline Nilsen, 2017-07-05

Eschewing the limiting idea that nineteenth-century architecture photography merely reflects functionality, the objective of this collection is to reflect the aesthetic, intellectual, and cultural concerns of the time. The essays

hold appeal for social and cultural historians as well as those with an interest in the fields of art history urban geography history of travel and tourism Nineteenth century photographers captured what could be seen and what they wanted to be seen Their images informed of exploration progress heritage and destruction Architecture was a staple subject for the first generation of photographers as it patiently tolerated the long exposures of the early processes During its formative decades photography responded to evolutionary cultural forces of market and artistic production Photographs of architecture reflected a specific political or social context modulated through individual points of view For this reason the examination of each photographic image as a primary visual document and an aesthetic object rather than a technical milestone on a chronological trajectory affords a richer multi faceted approach to the extensive and complex corpus of photographs taken by photographers all over the world This project acknowledges the importance of technique in the early decades of photography but focuses on the thematic content of the material It places the photography of architecture in an international context under the contemporary critical lens sharpened by theoretical and cultural examinations of the topic
