The Present-day English Gerund System Charlotte Maekelberghe, 2020-09-21 This study offers a first comprehensive synchronic account of the Present day English gerundial system Most synchronic studies of gerunds have hitherto focused on the verbal gerund scrutinizing its categorial status or comparing it with other non finite clausal structures A systematic comparison with its nominal counterpart however is lacking Based on a detailed

empirical analysis of lexico grammar and semantics this study develops an innovative cognitive constructionist model of the English gerund system which depicts the usage profiles of nominal and verbal gerunds in terms of probabilistic trends rather than by means of categorical labels It is shown that a better understanding of the functioning of the English gerund system requires a description that operates on multiple levels accounting for both the abstract construal gerunds can impose on an event as well as the token level constraints on variation between the two gerund types This multifaceted approach it is argued not only offers a new perspective on the configuration of ing forms in Present day English it can also be of relevance to the description of other complex grammatical structures *The Routledge Handbook of Semantics* Nick

Riemer,2015-07-30 The Routledge Handbook of Semantics provides a broad and state of the art survey of this field covering semantic research at both word and sentence level It presents a synoptic view of the most important areas of semantic investigation including contemporary methodologies and debates and indicating possible future directions in the field Written by experts from around the world the 29 chapters cover key issues and approaches within the following areas meaning and conceptualisation meaning and context lexical semantics semantics of specific phenomena development change and variation The Routledge Handbook of Semantics is essential reading for researchers and postgraduate students working in this area

Modality in Contact Carmelo Alessandro Basile,2024-09-02 This book explores the evolution of modal constructions of necessity and obligation in New Englishes Focusing on Singapore English analysis of corpus data reveals lower levels of grammaticalization compared to its lexifier British English This trend is explained through the lenses of a pan stratist model which considers a spectrum of forces influencing the dynamics of contact On the one hand cognitive mechanisms seem to

favour the selection of less grammaticalized and more transparent variants from the lexifier On the other hand the substrate is positioned as a background force actively contributing to the selection of new material to address functional gaps in the system
