Psychology Michael J. Stevens, Uwe P. Gielen, 2006-11-30 Toward a Global Psychology defines the emerging field of international psychology. Divided into three sections, *Psychoanalytic Explorations into the Primal Relationship in Japan and India* looks at each country's perception of parenthood and approach to raising children in turn, before concluding in an illuminating dialogue between the two authors. Kitayama explores the maternal figure within the mother-child relationship with a focus on the mother-son dyad, as well as relationships between parents. He considers in depth how Japanese culture can often exclude what is perceived as alien, delving into its rich tapestry of folklore to understand underlying mental scripts which can shape collective perceptions, societal norms, and expectations, each of which can pose an issue to healthy familial relationships. Basak's response draws from Indian socio-cultural and mythological contexts, as well as clinical applications, to provide psychoanalytic insight into the stark differences and similarities between attitudes in Japan, India, and the Western culture at large. Both authors join together to highlight different child-rearing practices such as co-sleeping and how they can shape human sexuality and subjectivity. Challenging the standardisation of the Oedipal myth, the book draws from literary and clinical examples in Japan and India to invite the reader into another world of parenting style and another idiom of psychoanalysis. Uniquely positioned to develop understanding of how psychoanalysis has developed in non-Western countries, this book is an essential resource for psychoanalysts in training and in practice.

Religion and Psychotherapy in Modern Japan Christopher Harding, Iwata Fumiaki, Yoshinaga Shin'ichi, 2014-09-15 Since the late nineteenth century, religious ideas and practices in Japan have become increasingly intertwined with those associated with mental health and healing. This relationship developed against the backdrop of a far broader and deeply consequential meeting between Japan's long-standing Chinese-influenced intellectual and institutional forms and the politics, science, philosophy, and religion of the post-Enlightenment West. In striving to craft a modern society and culture that could exist on terms with rather than be subsumed by Western power and influence, Japan became home to a religion-psy dialogue informed by pressing political priorities and rapidly shifting cultural concerns. This book provides a historically contextualized introduction to the dialogue between religion and psychotherapy in modern Japan. In doing so, it draws out connections between developments in medicine, government policy, Japanese religion and spirituality, social and cultural criticism, regional dynamics, and gender relations. The chapters all focus on the meeting and intermingling of religious with psychotherapeutic ideas and draw on a wide range of case studies, including how temple and shrine cures of early modern Japan fared in the light of German neuropsychiatry, how Japanese Buddhist theories of mind, body, and self

cultivation negotiated with the findings of western medicine how Buddhists Christians and other organizations and groups drew and redrew the lines between religious praxis and psychological healing how major European therapies such as Freud's fed into self consciously Japanese analyses of and treatments for the ills of the age and how distress suffering and individuality came to be reinterpreted across the twentieth and early twenty first centuries from the southern islands of Okinawa to the devastated northern neighbourhoods of the Tohoku region after the earthquake tsunami and nuclear disasters of March 2011 Religion and Psychotherapy in Modern Japan will be welcomed by students and scholars working across a broad range of subjects including Japanese culture and society religious studies psychology and psychotherapy mental health and international history

Every day human beings tell and are told stories sometimes in obvious ways sometimes not Most of our communication with each other direct or indirect involves narrative production and reception Narrative is constitutive of human being However whose narratives are heard Feminists argue that the relations between language knowledge gender and power particularly the question as to whether man made and controlled language is a material fit to receive and convey woman's stories are critical issues because historically patriarchy has worked to silence women's dialogue Male knowledge unsurprisingly created and continues to create unrepresentative maternal narratives which lead to unreal expectations of mothers and motherwork It is therefore disconcertingly significant for mothers that neither mothers nor their motherwork have been considered worthy of historical record nor are historical records usually written from a mother's perspective Hence the narrative research in this book which gives recognition to motherhood mothers and or the work they do is valuable It adds to the rapidly accumulating maternal research research that is now available for the historical record Mothers are speaking up developing a canon of literature research narrated in maternal language and claiming maternal knowledge and power
